# Question 1

---

## Question Type: MultipleChoice

---

A Microsoft Dataverse database contains two custom tables named TableA and TableB. The tables are configured with the following:

- \* A one-To-many relationship is configured between TableA and TableB.
- \* A lookup to TableA appears on a form in TableB.
- \* Both tables are components of an unmanaged solution.
- \* Both tables are components in a Power BI report.

You receive an error when attempting to delete Table

A) You need to delete the table.

What should you do?

### Options:

---

- A)** Remove TableA from the unmanaged solution.
- B)** Remove the relationship between TableA and TableB.

C) Remove the lookup field to TableA on the TableB form.

D) Remove TableA from the Power BI report.

**Answer:**

---

B

## Question 2

---

**Question Type: Hotspot**

---

You need to select data types for required fields.

Which data types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Question 4

---

### Question Type: MultipleChoice

---

A Microsoft Dataverse database contains two custom tables named TableA and TableB. The tables are configured with the following:

- \* A one-To-many relationship is configured between TableA and TableB.
- \* A lookup to TableA appears on a form in TableB.
- \* Both tables are components of an unmanaged solution.
- \* Both tables are components in a Power BI report.

You receive an error when attempting to delete Table

A) You need to delete the table.

What should you do?

**Options:**

---

- A) Remove TableA from the unmanaged solution.
- B) Remove the relationship between TableA and TableB.
- C) Remove the lookup field to TableA on the TableB form.
- D) Remove TableA from the Power BI report.

**Answer:**

---

B

## Question 5

---

**Question Type: Hotspot**

---

You create a suite of Power Platform-based order management canvas apps for a bakery that has five retail stores. Each store uses a tablet device to manage inventory and process orders.

You need to make the following changes to the original order tracking app:

When an online order for delivery is received, send the order to the bakery that is located closest to the order destination.

When an online order for pickup is received, require store staff to enter an estimated time in an app. Staff must prepare the order and then use the app to notify the customer when the order is ready.

Allow the store manager to personalize the company's corporate weekly newsletter and add store-specific specials.

You must minimize the amount of custom code and configuration required to implement the solution.

What should you use? To answer, select the appropriate options in the answer area.

**NOTE:** Each correct selection is worth one point.

**Answer:**

---

## Question 6

---

**Question Type: DragDrop**

---

You are researching integrations with several external systems.

Each integration has different requirements.

You need to determine which data sources to use to meet each requirement.

What should you use? To answer, drag the appropriate data sources to the correct requirements. Each data source may be used once, more than one, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

You cannot change the Entity primaryid field to some other field. CRM using GUID as the Primary key for each record.

If you definitely want to make some other field as Primary key, you could consider using Alternate Keys.

The caveat being that Alternate Keys can be created for Virtual Entity

All virtual entities are read-only.

Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.
