Question 1

Question Type: Hotspot

You need to design automation solutions for a company.

What should you implement? To answer, select the appropriate configuration in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Scenario Answer:

Sign into a web application that does not have an API and download a CSV file.

Technology

▼

- Cloud flow
- Desktop flow
- File system connector
- Outlook connector

Question 2

Question Type: Hotspot

You are developing a flow that needs to access a CSV file from a local drive.

The flow must be able to query several Azure endpoints and must use standard actions where possible.

You need to configure the flow.

Which actions should you use? To answer, select the appropriate options in the answer area.

▼

- SharePoint connector
- OneDrive connector
- File system connector
- Outlook connector

Send an email that includes a CSV file attachment.

NOTE: Each correct selection is worth one point.

▼

- SharePoint connector
- OneDrive connector
- File system connector
- Outlook connector

Answer Area

Requirement

Action

~~Answer:~~
Issue POST requests to the Microsoft Graph API by using application permissions.

▼

- HTTP
- HTTP with Azure AD
- Send an HTTP request to SharePoint
- Office 365 groups send an HTTP request

Question 3

~~Question Type: Drag Drop~~
Issue GET requests to the Microsoft Graph API by using delegated permissions.

You develop automation solutions for a company. The company does not permit changes to a deployed solution in user acceptance testing (UAT) a environments.

You need to package the solutions.

Issue POST requests to Office 365 Management APIs by using delegated permissions.

Which type of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more the once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Issue GET requests to the SharePoint REST API by using delegated permissions.

▼

- HTTP
- HTTP with Azure AD
- Send an HTTP request to SharePoint
- Office 365 groups send an HTTP request

▼

- HTTP
- HTTP with Azure AD
- Send an HTTP request to SharePoint
- Office 365 groups send an HTTP request

▼

- HTTP
- HTTP with Azure AD
- Send an HTTP request to SharePoint
- Office 365 groups send an HTTP request

Issue POST request to SharePoint REST API by using application permissions.

▼

- HTTP
- HTTP with Azure AD
- Send an HTTP request to SharePoint
- Office 365 groups send an HTTP request

Solution types	Answer Area	
Unmanaged <input type="checkbox"/>	Requirement	Solution type
Managed <input type="checkbox"/>	Deploy a solution to a source control system.	<input type="text"/>
	Deploy a solution to a user acceptance testing (UAT) environment.	<input type="text"/>
	Deploy a solution to a production environment.	<input type="text"/>
	Deploy a solution to another development environment.	<input type="text"/>

Question 4

Question Type: DragDrop

A user is evaluating the capabilities of both process mining and task mining.

You need to determine when you should use process mining or task mining.

Which Process advisor capability should you use? To answer, drag the appropriate capabilities to the correct requirements. Each capability may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Capabilities	Answer Area	
Process mining	Requirement	Capability
Answer:		
Task mining	See the actual steps used to perform a process.	<input type="text"/>
	Reduce process time by evaluating event data from a system of record.	<input type="text"/>
	Understand what employees do while performing each task.	<input type="text"/>
	Identify the most common actions based on user interactions.	<input type="text"/>

Question 5

Question Type: OrderList

You develop a desktop flow for a company.

You need to ensure that another user can modify the flow.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the order.

Actions

Add people and select the co-owner access type.

Select a flow and select **Share**.

Navigate to <https://flow.microsoft.com>.

Launch Power Automate for desktop.

Add people and select the user access type.

Answer area

1

2

3

Answer:

Navigate to <https://flow.microsoft.com>.

Question 6

Question Type: Hotspot

You develop Power Automate flows for a company. You need to help users locate and run the flows. Where should you direct users to find the flows? To answer NOTE: Each correct selection is worth one point.

Answer Area

Requirement

Value

Answer:

You select the **Send a copy** button from the flow portal to send the flow to a business user group.

▼

- the Solutions page
- the Shared with me tab of the My flows page
- the Shared with me tab of the Templates page

Question 7

Question Type: OrderList

~~You select the **Share** button from the portal to share the flow with business users.~~

You plan to implement a data loss prevention (DLP) policy for a production environment.

You need to define the policy.

▼

- the Solutions page
- the Shared with me tab of the My flows page
- the Shared with me tab of the Templates page

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Define the scope and add all environments to the policy.

Classify and assign connectors.

Review and create the policy.

Define the scope and add the environment to the policy.

Name the policy.

Add new tenant rules.

Answer:

Define the scope and add the environment to the policy.

Question 8

Question Type: DragDrop

A company plans to implement AI models to perform business processes.

You need to determine whether to use prebuilt or custom AI models.

Which type of model should you use for each scenario? To answer, drag the appropriate model types to the correct scenarios. Each model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Model types	Answer Area	
Answer:	Scenario	Model type
Prebuilt	Extract information from a receipt.	Model type
Custom	Detect spam emails.	Model type
	Identify the language used in a text document.	Model type
	Extract information from tax documents.	Model type

Question 9

Question Type: OrderList

You are designing an automation that processes information from documents attached to emails.

You need to extract data from the attachments and insert the data into a custom Microsoft Dataverse table.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer

Actions

- Create a collection and add documents to the collection.
- Create an object detection model.
- Use the model in a desktop flow.
- Create a custom form processing model.
- Train and publish a model.
- Add extracted data to the Microsoft Dataverse table.
- Use the model in a cloud flow.

Answer:

Create a collection and add documents to the collection.
Train and publish a model.
Use the model in a cloud flow.
Add extracted data to the Microsoft Dataverse table.
Use the model in a desktop flow.

Question 10

Question Type: OrderList

You have a machine that runs an automation solution.

You need to move the machine to a different environment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Select the new environment.

Navigate to <http://flow.microsoft.com/> and then select the connection.

Select **Refresh**.

Select the existing environment.

Launch the Power Apps Maker portal and select the machine.

Launch Power Automate – Machine runtime.

Answer area

Answer:

Select the power to operate the machine.
