Question 1

You are designing forms for a Microsoft Power Platform solution. Each person must see only the columns required for their department.

Department	Requirements
Inside sales	• Use only a browser-based app. • Include fields for contact name, phone number, product, order date, and total amount owed.
Fulfillment	• Use either a mobile or browser-based app. • Include fields for contact name, product, and order date.
Field sales	• Use only a mobile app. • Include fields for contact name, address, phone number, and product.

You need to ensure that the forms open correctly, display only the fields needed, and that data can be entered quickly. How should you design the form?

Options:

A- Create one form for each department Add only columns needed on the form for each department. Assign the appropriate security role to each form.

B- Create a shared form for all departments. Add all the columns. Add column-level security to columns not needed for each department

C- Create one form for each department. Add all columns needed for all departments. Use business rules to hide columns.

D- Add new columns to an existing form. Grant all departments security roles for that form.

Answer:

A

Question 2

Question Type: DragDrop

You are designing a solution to automate the following processes:

* Import data into Microsoft Dataverse from systems that have an API available.

* Import data into Microsoft Dataverse from systems that do not have an API available.

* Validate that contacts in a Microsoft Excel file Dataverse forms in a specified order.

You need to implement automation methods.

Which components should you use' To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Components

Cloud flow

Business process flow

Answer:

Robotic process automation

Answer Area

Requirement	Component
Interact with applications that do not have an API.	
Guide users through business steps in a specific order.	
Interact with applications that have an API.	

Question 3

You are a Microsoft Power Platform architect.

You have identified several project risks.

You need to categorize potential risks that are specific to your customer.

How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories		Answer Area

Resource risk   sk

Risk   **Cate**

The project requires integration to custom-built on-premises
systems that store business-sensitive data.

External risk   isk

The organization is currently making significant go-to-market
strategy adjustments.

Security risk   isk

The customer has a limited budget in relation to the project
requirements.

Question 4

Question Type: Hotspot

You are designing a Microsoft Power Platform solution for a national repair service. The service has a 24-hour call center for customers to call and schedule repairs.

The solution dispatches a technician to troubleshoot and repair customer issues. Customers sign into a customer portal to view and log information concerning the repairs. The repair service contracts with third party technicians for repair jobs

The solution must meet the following requirements:

* Dispatch technicians to troubleshoot and repair customer issues

* Call center must log customer issues.

* Third -party technicians must be able to access assigned repair service jobs.

You need to recommend an authentication strategy.

Which authentication models should you use? To answer, select the appropriate options in the answer area.

Answer Area

Answer:

User type	Authentication model
Call center employee	

Azure AD and a security role
Azure AD and a web role
Authenticated user and a security role
Authenticated user and a web role

Question 5

Question Type: DragDrop

User type	Authentication model
Repair service customer	

Azure AD and a security role
Azure AD and a web role
Authenticated user and a security role
Authenticated user and a web role

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain protect. The project has the following requirements:

* Retail employees must use the application on a company- prowled tablet device.

* The app must store data offline

* Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity

* Apps are shared with security group teams for users to access.

User type	Authentication model
Third-party technician	

Azure AD and a security role
Azure AD and a web role
Authenticated user and a security role
Authenticated user and a web role

You need to identify the project s functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Categories		Answer Area	
Functional			
Non-functional			

Answer:

Requirement	Category
Retail employees must use the application on a company-provided tablet device.	
The app must store data offline.	
Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.	
Apps are shared with security group teams for users to access.	

Question 6

You are overseeing the data migration for a Microsoft Power Platform solution.

The migration team is performing a test migration with a subset of dat

a. The migration team reports the following findings:

Users who own account rows are receiving system generated emails.

Data that is not part of the migration is being added to the Contact and Appointment tables.

The size of the log listed on the Power Platform admin center Capacity page has increased significantly.

You need to recommend strategies to resolve the reported issues.

What should you recommend? To answer, drag the appropriate resolution to the correct migration problem. Each resolution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Resolution strategies	Migration issue	Resolution str
Disable auditing. ng.		

Answer:

Users who own account rows are receiving system generated emails.
