Question 1

Question Type: DragDrop

You plan to create a model-driven app for a company that sells plants and garden supplies. The app must meet the following requirements:

- * Automatically send email to a customer when a record is modified.
- * Ensure that all sales people follow the same steps when processing sales.

You need to create Power Automate flows for the app.

The screenshot shows a Power Automate interface with two main sections: 'Flow types' and 'Answer Area'. The 'Flow types' section on the left lists 'Button', 'Automatic', and 'Scheduled' with corresponding input boxes. Below these is a blue 'Answer:' label and the text 'Business Process'. The 'Answer Area' on the right is divided into 'Requirement' and 'Flow type' columns. The 'Requirement' column contains two items: 'Send email to customers.' and 'Ensure that salespeople follow the same steps.' The 'Flow type' column contains two empty input boxes. A horizontal line is drawn across the bottom of the screenshot.

Question 2

Question Type: MultipleChoice

You test a business process flow in a sandbox environment.

When you complete testing, you must copy the business process flow to a production environment without bringing any data or other modifications with it.

You must meet the requirements.

What should you do?

Options:

- A-** Export the default solution.
- B-** Export the form that contains the business process flow to a separate solution.
- C-** Add the business process flow to a separate solution. Export the solution.
- D-** Create a view and export the view.

Answer:

A

Question 3

Question Type: Hotspot

You are creating Power BI visualizations.

You need to display the visuals where a user can perform each function.

Which solution should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:	Requirement	Solution
---------	-------------	----------

Make decisions by analyzing high-level KPIs.

- Power BI service
- Power BI Desktop
- Power BI dashboards

Question 4

Question Type: MultipleChoice

Drill down into the details of a visual.

You are using the Power BI service to view a visual on a report that has been shared with you. You need to add the visual to a dashboard as a tile. Which action should you perform?

- Power BI reports
- Power BI Desktop
- Power BI dashboards

Options:

A- Copy

B- Spotlight

C- Export data

D- Pin

Answer:

D

Question 5

Question Type: MultipleChoice

A company is implementing Power Automate to streamline operations.

The head of customer support relations needs a Power Automate flow that texts a manager when an email meets the following criteria:

- * The email is sent as high priority.
- * The email is from a customer.

You need to identify how the flow's decision point will know whether the criteria are met. What should you use?

Options:

A- data operations

B- expressions

C- variables

D- actions

E- triggers

Answer:

C

Question 6

Question Type: MultipleChoice

You are developing reports for a company.

You must create visualizations that include the following data:

Invoices due from a third-party enterprise resource planning (ERP) system

Number of calls made to the client from Microsoft Dataverse

Microsoft Excel file data

The reports must be displayed in a single page.

You need to create the visualizations.

What should you use?

Options:

A- deployment pipelines

B- tables

C- columns

D- dashboards

Answer:

D

Question 7

Question Type: DragDrop

A company uses a model-driven app for its sales team.

You must customize a form to meet the following requirements:

- * If a check box is checked, a hidden field must appear.
- * The form must display a list of customers and fields about customers.

You need to identify the components a developer must configure to meet the requirements. What should you identify?

Components	Answer Area	Requirement	Component
Column	●	Hidden field appears	Com
Answer: View	●	List of customers and fields displays	Com
Form	●		
Table	●
