Question 1

Question Type: MultipleChoice

Which two types of resources can be protected by using Azure Firewall? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Azure virtual machines
- B- Azure Active Directory (Azure AD) users
- C- Microsoft Exchange Online inboxes
- D- Azure virtual networks
- E- Microsoft SharePoint Online sites

Answer:

D, E

Explanation:

Firewall is really not directly protecting the Virtual Networks though DDOS would have been ideal for VNETS

Question 2

Question Type: MultipleChoice

What feature in Microsoft Defender for Endpoint provides the first line of defense against cyberthreats by reducing the attack surface?

Options:

- A- automated remediation
- B- automated investigation
- C- advanced hunting
- D- network protection

Answer:

D

Explanation:

Network protection helps protect devices from Internet-based events. Network protection is an attack surface reduction capability.
