Question 1

Question Type: MultipleChoice

An Okta Administrator ran a full import from Active Directory. An expected group was NOT imported into Okta.

a. Is this a reason why the group was NOT imported into Okta?

Solution: The organizational unit (OU) containing the group was NOT selected for Import.

Options:

A- Yes

B- No

Answer:

B

Question 2

Question Type: MultipleChoice

Is this a multifactor type that an Okta Administrator should configure for an end user who does NOT have access to a mobile device?

Solution: Okta Verify

Options:

A- Yes

B- No

Answer:

B

Question 3

Question Type: MultipleChoice

Is this a function of Okta Universal Directory?

Solution: Locating duplicate accounts

Options:

A- Yes

B- No

Answer:

B

Question 4

Question Type: MultipleChoice

Is this the provisioning feature that an Okta Administrator uses to ensure end user accounts are automatically created upon first login?

Solution: Just-in-Time (JIT) provisioning

Options:

A- Yes

B- No

Answer:

A

Question 5

Question Type: MultipleChoice

Is this the expected outcome when both Identity Provider (IdP) initiated flow and Service Provider (SP) initiated flow are configured and required for an application?

Solution: The end needs to authenticate to the application with user name and password and then again with Okta.

Options:

A- Yes

B- No

Answer:

B

Question 6

Question Type: MultipleChoice

Is this the expected outcome when both Identity Provider (IdP) initiated flow and Service Provider (SP) initiated flow are configured and required for an application?

Solution: The end user can choose to authenticate through Okta or through the application with user name and password.

Options:

A- Yes

B- No

Answer:

A

Explanation:

Once the user is redirected to Okta they'll need to enter their Okta credentials, unless they had already authenticated into Okta in a previous session within the same browser. In either case, a successful authentication request will redirect the user back to the

SP's Assertion Consumer Service (ACS) URL with an embedded SAML response from Okta. At a minimum, the response will:

Indicate that it is indeed from Okta and hasn't been altered, and contain a digital signature proving such. This signature will be verified by the SP using a public key from Okta that was previously uploaded to the SP as a certificate.

Indicate that the user has authenticated successfully into Okta

Indicate who the user is via the NameID, a standard attribute used in SAML assertions.
