Question 1

Question Type: MultipleChoice

Which statement is true for a BPMN subprocesses?

Options:

- A- It has access to the data variables of the main process.
- B- Data have to be explicitly passed back and forth between the main process and the subprocess.
- C- The subprocess can be reused and called from other processes.
- D- The sequence flow inside a subprocess can be diverted and joined to the main flow without going through an end event.

Answer:

C

Question 2

Question Type: MultipleChoice

Which two statements are true about using Process Player to test a process? (Choose two.)

Options:

- A-** All activities must be implemented for a process before you can run it with Process Player.
- B-** When you are running a process by using Process Player and it reaches a user task that has an associated form, you must display the form to select the task outcome.
- C-** As a process runs in Process Player, the BPMN diagram is animated to show the flow through the model.
- D-** Before running Process Player, you must map all roles in your process to at least one user or group in your organization.

Answer:

B, D

Question 3

Question Type: MultipleChoice

Which event will be raised when a case is suspended?

Options:

A- Lifecycle

B- Activity

C- Milestone

D- User-defined

Answer:

D

Question 4

Question Type: MultipleChoice

What determines the life span of the value in a subprocess data object?

Options:

A- process

- B- task
- C- subprocess
- D- project

Answer:

D

Question 5

Question Type: MultipleChoice

In which two tools can you explore the path taken by a running process instance? (Choose two.)

Options:

- A- Enterprise Manager
- B- Process Composer
- C- Weblogic Console
- D- Business Process Workspace

Answer:

A, D

Question 6

Question Type: MultipleChoice

You have a situation where a collection of rules might provide a flexible way of externalizing logic in an application.

Which two are accurate considerations to access as you decide to use a decision table or if-then rules? (Choose two.)

Options:

- A-** The decision table's spreadsheet metaphor is compact and familiar to end users.
- B-** Decision tables can use globals while if-then rules cannot.
- C-** The logic likely requires more rules if expressed as a decision table.
- D-** Unlike with a decision table, an Expression Builder is provided for if-then rules to help you craft condition expressions.
- E-** Built-in error prevention features for decision tables can help you build more complete and accurate rules.

Answer:

B, E

Question 7

Question Type: MultipleChoice

Which component enables a shared work environment for a BPM Suite 12c project where process analysts use Process Composer and process developers use BPM Studio?

Options:

- A- Oracle Enterprise Repository
- B- Meta Data Services
- C- Process Asset Manager
- D- Apache Derby DB

Answer:

C

Explanation:

You can use the Process Asset Manager to share BPM projects between the different persons working on the project

https://docs.oracle.com/middleware/1213/bpm/bpm-develop/bac_bpmpd.htm#BPMPD87526

Question 8

Question Type: MultipleChoice

Which two statements are true about using project data objects? (Choose two.)

Options:

- A-** Any process in the project can access a project data object.
- B-** The value of a project data object does not vary between processes.
- C-** Project data objects can be used only as input arguments to a process.
- D-** Project data objects can be used in data associations and expressions.

Answer:

A, D
