## Question 4

---

**Question Type: MultipleChoice**

---

Your customer has three data centers in three different locations, location A has their production database running on Oracle Database 12c. They want to replicate the data from location A to location B, which is 50 miles away and is used for disaster protection and database rolling upgrades. They also want to create a replica database at location C, which must be open in read-write mode, while synchronizing with the primary database.

Which two solutions would you recommend to your customer?

**Options:**

---

- A- Oracle GoldenGate
- B- Oracle Advanced Replication
- C- Oracle Active Data Guard
- D- Oracle Streams

**Answer:**

---

A, C

**Question 5**

---

**Question Type: MultipleChoice**

---

Your customer needs server availability that provides uninterrupted access to database services, handling any unexpected failure of one or more machines hosting the database server, due to a hardware or software fault. Which product should your customer use?

**Options:**

---

- A- Oracle Data Guard
- B- Oracle Streams
- C- Oracle Real Application Clusters
- D- Oracle GoldenGate

**Answer:**

---

C

**Explanation:**

---

<http://www.oracle.com/technetwork/database/availability/maximum-availability-wp-12c-1896116.pdf> (page 5, Server HA: Oracle Real Application Clusters)

## Question 6

---

**Question Type:** MultipleChoice

---

Which two are client-side components of Oracle Data Guard Broker?

### Options:

---

- A- Oracle Enterprise Manager Cloud Control
- B- Oracle Data Guard monitor
- C- Oracle Data Guard command-line interface (DGMGRL)
- D- Oracle Data Guard Broker Manager

### Answer:

---

A, C

### Explanation:

---
