Question 1

Question Type: MultipleChoice

What three artifacts are created as a result of running the JeOS tool?

Options:

- A-** a System.img file representing the operating system
- B-** optional image files as specified in the command
- C-** a README file with product name, version number and build timestamp
- D-** a vm.cfg file pointing to the created images, along with specified memory and CPU information
- E-** a tar.gz file with all of the images, README and vm.cfgfiles compressed

Answer:

A, D, E

Question 2

Question Type: MultipleChoice

A new shared virtual disk is created by the Administrator and placed in a group named Development. A user with Development as a group creates a new virtual machine but cannot see the new shared disk when trying to attach it using the Oracle VM Manager.

What is the problem?

Options:

- A-** The virtual machine is hardware virtualized, not paravirtualized, and shared virtual disks are not visible to hardwarevirtualized guests.
- B-** The user needs approval from the Administrator to see the shared disk, even though he is in the Development group.
- C-** The Administrator needs to make the shared virtual disk public before it can be seen by members of the Developmentgroup.
- D-** The user's virtual machine is not in the Development group.

Answer:

C

Question 3

Question Type: MultipleChoice

What command will show the current status of all Oracle VM Agent components?

Options:

- A- service ovs status
- B- xm show ovs-agent
- C- service ovs-agent status
- D- repos.py -1
- E- xm dmesg

Answer:

C

Question 4

Question Type: MultipleChoice

If a guest domain is not responding, and powering off the guest through the console does not work, which xm command can be used to kill the guest immediately (equivalent to pulling the power plug)?

Options:

A- xm shutdown

B- xm reset

C- xm destroy

D- xm delete

E- xm pause

Answer:

C

Question 5

Question Type: MultipleChoice

What does tools are available from Oracle that best describe virtual machine performance of a virtual machine?

Options:

- A- xm list
- B- oswatcher installed in the guests
- C- top
- D- xm top
- E- cat /proc/cpuinfo

Answer:

D

Question 6

Question Type: MultipleChoice

If the server pool data on the server pool master is damaged or corrupted, what is the correct course of action to restore the server pool?

Options:

- A- On each Oracle VM server, stop the agent, delete all files in /etc/ovs-agent/db, then restart the agent.
- B- From the Oracle VM Manager, select the Server Pools tab and do a Restore operation on the server pool.

C- On the server pool master, stop the agent, delete all files in /etc/ovs-agent/db, then restart the agent.

D- From the Oracle VM Manager, select the server pool master on the Servers tab, and Reboot the server.

Answer:

B
