Question 1

Question Type: MultipleChoice

A customer is looking for an analytics tool that uses the logs on the firewall to detect actionable events on the network. They require something to automatically process a series of related threat events that, when combined, indicate a likely compromised host on their network or some other higher level conclusion. They need to pinpoint the area of risk, such as compromised hosts on the network, allows you to assess the risk and take action to prevent exploitation of network resources.

Which feature of PAN-OS can you talk about to address their requirement to optimize their business outcomes?

Options:

- A- The Automated Correlation Engine
- B- Cortex XDR and Cortex Data Lake
- C- WildFire with API calls for automation
- D- 3rd Party SIEM which can ingest NGFW logs and perform event correlation

Answer:

A

Question 2

Question Type: MultipleChoice

The need for a file proxy solution, virus and spyware scanner, a vulnerability scanner, and HTTP decoder for URL filtering is handled by which component in the NGFW?

Options:

- A- First Packet Processor
- B- Stream-based Signature Engine
- C- SIA (Scan It All) Processing Engine
- D- Security Processing Engine

Answer:

B

Question 3

Question Type: MultipleChoice

Which security profile on the NGFW includes signatures to protect you from brute force attacks?

Options:

- A- Zone Protection Profile
- B- URL Filtering Profile
- C- Vulnerability Protection Profile
- D- Anti-Spyware Profile

Answer:

C

Question 4

Question Type: MultipleChoice

What is the key benefit of Palo Alto Networks Single Pass Parallel Processing design?

Options:

- A- There are no benefits other than slight performance upgrades
- B- It allows Palo Alto Networks to add new functions to existing hardware
- C- Only one processor is needed to complete all the functions within the box
- D- It allows Palo Alto Networks to add new devices to existing hardware

Answer:

B

Question 5

Question Type: MultipleChoice

Which Palo Alto Networks pre-sales tool involves approximately 4 hour interview to discuss a customer's current security posture?

Options:

- A- BPA

- B- PPA
- C- Expedition
- D- SLR

Answer:

A

Question 6

Question Type: MultipleChoice

The firewall includes predefined reports, custom reports can be built for specific data and actionable tasks, or predefined and custom reports can be combined to compile information needed to monitor network security.

The firewall provides which three types of reports? (Choose three.)

Options:

- A- SNMP Reports
- B- PDF Summary Reports

- C- Netflow Reports
- D- Botnet Reports
- E- User or Group Activity Reports

Answer:

C, D, E

Question 7

Question Type: MultipleChoice

Which three signature-based Threat Prevention features of the firewall are informed by intelligence from the Threat Intelligence Cloud?
(Choose three.)

Options:

- A- Vulnerability protection
- B- Anti-Spyware
- C- Anti-Virus

D- Botnet detection

E- App-ID protection

Answer:

A, B, E
