A, B, E

Question 8

Question Type: DragDrop

Pega Robot Studio has several methods to manage the flow of an automation depending on when a control is matched.

In the Answer Area, drag the description on the left to its matching Design Block.

Answer Area

Answer:

This option requires the automation to pause for only one control defined in the design block to be created before proceeding through the automation.

This option converts a control's event to a method by initiating the trigger for the event and the subsequent flow once the event occurs.

This option requires the automation to pause for all controls defined in the design block to be created before proceeding through the automation.

This option may pause an automation's process until one control's Created event occurs within a pre-defined or customized timeframe.
