Question 1

Question Type: MultipleChoice

A disrupted transaction case records account information using a page property. Account information is recorded at the time the case is created and does not update when the case is further processed. Account information is stored in an external system and accessed by a data page.

How do you configure the account information page?

Options:

- A- Select refer to a data page on the page property
- B- Configure the page property to refer to a keyed data page
- C- Define a reference property that refers to the data page
- D- Select copy from a data page on the page property

Answer:

D

Question 2

Question Type: MultipleChoice

You are building a new booking application in pega platform with a case type that displays a customer's various accounts and allows them to make banking transactions. The transaction data object allows customers to dispute a transaction. The system provides a drop-down list of reasons for the dispute, which are collected along with the transaction ID. According to pega best practices, which option do you use to source the transaction data object?

Options:

- A- External system of record
- B- A data page
- C- Pega platform system of record
- D- No system of record

Answer:

C

Question 3

Question Type: MultipleChoice

An application allows consultants to enter hours worked on a project on a weekly basis.

Consultant hours need approval by the manager and the project supervisor. The approvals can occur in any order

Which approval configuration meets this requirement?

Options:

- A-** Configure a parallel process for each of the required approvals
- B-** Add the manager approval to an alternate stage in the case life cycle
- C-** Add an optional action for each approval in the appropriate stage
- D-** Configure a single cascading approval based on an authority matrix

Answer:

A

Question 4

Question Type: MultipleChoice

Drag the appropriate ruleset version type to the corresponding scenario.

1. Version
2. Minor Version
3. Patch Version

Options:

- A-** You need to update a decision table to correct one of the expected results
- B-** You need to add new options and processing behaviour to a cancellation process
- C-** You need to add a case type to provide a new Micro journey to users.

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

A human resources application contains reports that are used to review hiring practices. The product manager has asked you to test the recent hire training report.

How do you run a unit test on the report?

Options:

- A- Create a copy of the rule and use the run rule window
- B- Initialize the rule with test data using the run rule window
- C- Identify a data test page to unit test the rule
- D- Run the report definition using the contents of a database table

Answer:

D

Question 6

Question Type: MultipleChoice

In a banking application, which two options must be used together to present users with a set of balance transfer options only if they elect to transfer a balance to their credit card? (Choose two)
