Question 1

A merchant checked the "Show Orderable Products Only" preference in Business Manager. What impact does this have on the Storefront from a user perspective?

Options:

A- Back-order products will be excluded from search results.

B- Products with an Available to Sell (ATS) - 0 will be excluded from search results.

C- The product detail page will be hidden if Available to Sell (ATS) = 0.

D- Pre-order products will be excluded from search results.

Answer:

B

Question 2

A merchant has a new requirement to accept American Express credit cards on its Storefront. A credit card payment method already exists.

Which step must a developer take in Business Manager to achieve this?

Options:

A- In Payment Methods, enable American Express as a credit card type.

B- Add American Express into the Order settings in Site Preferences.

C- In Payment Processor, create American Express as a payment type.

D- Add American Express as a Payment Preference in Site Preferences.

Answer:

A

Question 3

Question Type: **MultipleChoice**

A client has three different sites with three locales. Two of the sites share a library and one site has a private library.

What does the shared library allow in this context?

Options:

A- Sharing content slots between sites

B- Sharing content assets among locales

C- A Sharing content assets between sites

D- Sharing content slots among locales

Answer:

C

Question 4

Question Type: **MultipleChoice**

A developer is tasked with implementing the necessary code for a new Page Designer component.

What are the two purposes of the JSON metadata definition file that the developer creates7

Choose 2 answers

Options:

A- Defines regions within the component type.

B- Defines the responsive layout of the rendered template.

C- Defines the business and rendering logic of the component required by the merchant.

D- Defines the attributes that a merchant enters when using the component type.

Answer:

A, D

Question 5

The client provides the system integrator with translation messages for the newly added "French" ("fr") locale.

What is the correct folder to store the associated .properties files?

Options:

A- cartridge/templates/fr

B- A cartridge/templates/resources

C- cartridge/resources

D- cartridge/templates/resources/fr

Answer:

B

Question 6

A developer needs to perform the same additional checks before completing multiple routes in a custom controller, in order to decide whether to render a template or redirect the user to a different page.

According to SFRA best practices, what is the correct approach to improve code reusability in this scenario7

Options:

A- Define a new middleware function and use it in the existing routes.

B- Append a new function to all the existing routes with the server module.

C- Replace the existing routes by creating a controller in separate new cartridge.

D- Use the superModule property in the existing routes to extend their functionality.

Answer:

A

Question 7

The developer is asked to enhance the functionality of an existing controller route by adding information to the response's viewData.

How should the developer approach this task while following SFRA best practices?

Options:

A- Replace the callback function of the existing route using superModule.

B- Use the 'extend' method of the server module for the existing route.

C- Copy the existing route in a new cartridge and modify where necessary.

D- Use the 'append' method of the server module for the existing route.

Answer:

B

Question 8

Question Type: MultipleChoice

A developer needs to display a products list of their "Women Dresses" category in a new web application, independent of their main B2C Commerce site. This custom listing page needs to be styled differently from the existing one, as per marketing requirements.

Which B2C Commerce tool should the developer use to collect the necessary information?

Options:

A- The ProductSearch resource of the Shop OCAPI.

B- The existing category's endpoint to perform a REST call.

C- The iframe of the existing category page.

D- The Search-Show Controller URL to perform a web crawl.

Answer:

D

Question 9

A Storefront is designed so that multiple pages share a common header and footer layout.

Which ISML tag should a developer use on the templates for these pages to avoid code repetition in the most effective way?

Options:

A- <isdecorate> ... </isdecorate>

B- <iscontent> ... </iscontent>

C- <isreplace> ... </isreplace>

D- <isinclude> ... </isinclude>

Answer:

A

Question 10

Question Type: MultipleChoice

A developer working on a simple web service integration is asked to add appropriate logging to allow future

troubleshooting.

According to logging best practices, which code should the developer write to log when an operation succeeds, but has an unexpected outcome that may produce side effects?

Options:

A- Logger.info('Unexpected service response')

B- Logger.debug('Unexpected service response')

C- Logger.error('Unexpected service response')

D- Logger.warn('Unexpected service response')

Question 11

Question Type: MultipleChoice

A Newsletter controller contains the following route:

Server.post('Subscribe', function (req,res,next){

var newsletterForm = server.forms.getForm('newsletter');var CustomObjectMgr = require('dw/object/CustomObjectMgr');

if(newsletterForm.valid){

try{

var CustomObject =

CustomObjectMgr.createCustomObejct('NewsletterSubscription', newsletterform.email.value);

CustomObject.custom.firstName = newsletterForm.fname.value;

CustomObject.custom.lastName = newsletterForm.lname.value;-

} catch(e){

```
//Catch error here

}

}

next();

});
```

Assuming the Custom Object metadata exists, why does this route fail to render the newsletter template

when the subscription form is correctly submitted?

Options:

A- Custom Objects can only be created by Job scripts

B- The Subscribe route is missing the server.middleware.httpt middleware.

C- The CustomObjectMgr variable should be declare outside of the route.

D- The Custom Object creation is not wrapped in a Transaction.

Answer:

D
