Question 1

Question Type: MultipleChoice

When exporting a price book from an external system, which file format or formats should a developer use so it can be imported into a B2C Commerce site?

Options:

- A- JSON only
- B- XML only
- C- CSV only
- D- XML and CSV

Answer:

A

Question 2

Question Type: MultipleChoice

A developer has these requirements for out-of-stock products:

Save the SKUs of the out-of-stock products that the customer is interested in

Save the customer email regardless if the customer is a guest or registered

Email the customer when the product is back-in-stock

Which step should the developer perform as part of the solution to achieve the requirements?

Options:

- A-** Create a new set-of-string type custom attribute to the system object type Profile to save all the SKUs and use the existing email field for the email.
- B-** Create a new system object type that has a set-of-string type custom attribute for the SKUs and a string for the email field.
- C-** Create a new custom object type that has a set-of-string type custom attribute for the SKUs and a string for the email field.
- D-** Create a new set-of-string type custom attribute to the system object type Product to save all the customer email addresses for back-in-stock notification.

Answer:

D

Question 3

Question Type: MultipleChoice

Active Log category is "root"

Log level of WARN

The code below is executing:

```
var log = Logger.getLogger("products");
```

Using this information, which two logs will be written?

Choose 2 answers

Options:

A- `log.warn('This is a warn message');`

B- `log.error('This is an error message');`

C- `log.info('This is an info message');`

D- `log.debugThis is a debug message');`

Answer:

A, C

Question 4

Question Type: MultipleChoice

When looking at Custom Object instances for a site, a merchant notices that the creation date is not showing up on the instances in Business Manager.

Where should the developer add this attribute to the Custom Object so it is visible for the merchant to see in Business Manager?

Options:

- A-** Assign the current date/time to a new custom attribute, `creationDate`, via code.
- B-** Add the creation date to the attributes of the Custom Object.
- C-** Mark the existing creation date attribute as visible.
- D-** Add the creation date to the attribute group for the Custom Object.

Answer:

B

Question 5

Question Type: MultipleChoice

A developer is implementing new Page Designer content on a merchant's Storefront and adds the line below to

```
apiContentSearchModel.setFilteredByFolder(false);
```

What does this achieve?

Options:

- A-** Enables searching to find Page Designer content assets that are not in folders.
- B-** Prevents Page Designer pages and components from being searchable.
- C-** Filters Page Designer search results into separate page and component folders.
- D-** Extends the ConrencSearchModei to allow the folder filter.

Answer:

A
