Question 1

A consultant built a Tableau CRM dashboard for a shipping company. The consultant enabled data sync (replication) to increase the speed to datasets refreshing.

How often will the data on the dashboard be refreshed?

Options:

A- When the dashboard viewer clicks the Refresh button.

B- When the Data Sync runs to completion, and then recipe runs to completion.

C- When recipe runs to completion, and then Data Sync runs to completion.

D- Each time a user opens the dashboard

Answer:

C

Question 2

Which two recommended techniques can be used to access tableau CRM data from a remote app or website? Choose 2 answers

Options:

A- Use an Iframe to embed the Salesforce page in a remote site.

B- Use Lightning out to embed a dashboard component in the remote site.

C- Use HTTPS to call the /wave/query API, supplying an encoded SAQL query as a parameter.

D- Export the data to a CSV, copy it to a USB drive, and load it on the remote site.

Answer:

B, C

Question 3

Question Type: **MultipleChoice**

A consultant wants to understand what the important predictors are in the story.

What are two places where this information can be found?

Choose 2 answers

Options:

A- In the Einstein Recommendations for story improvement. If there are no recommendation to remove strongest predictors, the story doesn't hold any Important predictors but only weak (probably unrelated) terms.

B- In the Story Settings, where the strength of predictor fields is calculated and visualized. The consultant can sort the list of predictor fields accordingly.

C- In the Model Deployment Wizard while selecting the actionable fields

D- In the Model Metrics section, where the top predictors are listed

Answer:

B, D

Question 4

Question Type: **MultipleChoice**

Refer to the exhibit.

Filtering

☑ Apply global filters

Filtering ID

None

Selection Type

Single selection

☑ Broadcast selections as facets

Universal Containers reports that nay selection in the List widget is not affecting the pie chart in one of their tableau CRM dashboard. They query options associated with the List widget and Pie chart are shown in the graphic

Which change can a Tableau CRM Consultant implement to solve this issues, given that the queries are using the same dataset?

Options:

A- Set faceting to All instead of None in the query "Step_pie_1."

B- Use result binding/interaction in the filters section of the query "Step_pie_1."

C- Set faceting to all instead of None in the query "Region_1."

D- Use selection binding/interaction in the filters section of the query "Region_1."

Answer:

A

Question 5

Question Type: MultipleChoice

A Tableau CRM consultant has just completed deployment of an analytic app containing a recipe plus several datasets and dashboards. While conducting post deployment a smoke test, the new datasets don't seem to have migrated.

What post migration step has likely been forgotten?

What post migration step has likely been forgotten?

Options:

A- Apply security predicates on datasets

B- Run the recipe

C- Provide read access on the datasets

D- Go to Analytics Settings in Setup and approve the deployment

Answer:

B

Question 6

Question Type: **MultipleChoice**

A consultant has been brought in to help increase the adaption of Tableau CRM. It has been identified that account managers are struggling to get an overview of their accounts before meeting with them. Ideally they would like to have key details highlighted about active cases and opportunities, opportunity value and product whitespace.

What can the consultant do to increase adoption?

Options:

A- Create 4 analytics lenses and embed them onto the account record page

B- Create datasets for account managers to explore

C- Create a dashboard and embed it onto the account record page with a filter based on the viewed account

D- Create a dashboard and embed onto the account record page

Answer:

C

Question 7

Question Type: **MultipleChoice**
