# Question 1

**Question Type:** MultipleChoice

Universal Containers CUC) Customer Community is scheduled to go live in the Europe, Middle East, and Africa (EMEA) region in 3 months. UC follows a typical centralized governance model. Two weeks ago, the project stakeholders informed the project team about the recent changes in mandatory compliance requirements needed to go live. The project team analyzed the requirements and have estimated additional budget needs of 30^0 of the project cost for incorporating the compliance requirements.

Which management team is empowered to approve this additional budget requirements?

## Options:

**A-** Security Review Committee

**B-** Project Management Committee

**C-** Executive Steering Committee

**D-** Change Control Board

## Answer:

C

# Question 2

**Question Type:** MultipleChoice

Which two statements are accurate about why Mock objects are needed when writing test classes?

Choose 2 answers

## Options:

**A-** Mock can also be used on the classes that extend the batchable interface to bypass the batch jobs.

**B-** Using a Mock allows the test class to bypass the dependencies of other objects, methods, state, or behaviors. Therefore, the developer has total control of his own code.

**C-** Some methods are invoking long running processes, using Mock is a shortcut of bypassing the long executions.

**D-** A Mock is needed whenever the code makes an HTTP callout.

## Answer:

B, D

# Question 3

**Question Type:** MultipleChoice

The team at Universal Containers is building an application on Java that will interact with its Salesforce application. They want to use SOQL queries to retrieve and make changes to smaller pieces of Salesforce metadata through this application.

Which API should the team leverage?

### Options:

**A-** Tooling API

**B-** Any Salesforce API

**C-** User Interface API

**D-** Metadata API

### Answer:

A

# Question 4

**Question Type:** MultipleChoice

A developer was trying to retrieve the metadata from an org and ran the sfdx force:source:retrieve command. When the command was run, the developer received the error message: "This command is required to run from within an SFDX project"

What can be two possible reasons that caused this problem? Choose 2 answers

### Options:

**A-** The developer hadn't run the sfdx force:project:create command.

**B-** The developer forgot to add the -n option with a project name as a command line argument.

**C-** The developer created the project within VSCode, but ran the command in a separate terminal.

**D-** The developer created the project, but ran the command outside of the project directory.

### Answer:

A, D

## Question 5

**Question Type:** MultipleChoice

Universal Containers is having trouble aligning releases between major, minor, and Salesforce seasonal releases.

What should an architect recommend?

### Options:

**A-** Gate all release decisions at the center of excellence.

**B-** Create a release calendar, train and align all the teams.

**C-** Share the test plans between the teams on each release type.

**D-** Create a spreadsheet of metadata changes and reconcile the overlaps.

### Answer:

B

## Question 6

**Question Type:** MultipleChoice

Northern Trail Outfitters (NTO) has well-defined release management processes for both large and small projects. NTO's development team created a workflow and a trigger for the changes in its opportunity renewal process.

What should the architect recommend for release planning of these changes?

## Options:

**A-** Plan this as a patch release and align with the Salesforce patch release.

**B-** Plan this as a major release and align with a Salesforce major release.

**C-** Plan this as a minor release with training and change management.

**D-** Plan this an interim release after checking with Salesforce support.

## Answer:

C

# Question 7

**Question Type:** MultipleChoice

Universal Containers CUC) is hiring offshore agile development teams to decrease costs and enhance UC's capability of delivering new features to its customers. However, the CTO Is not able to follow or measure the work of those teams.

What should an architect recommend to increase transparency?

## Options:

**A-** Schedule a daily stand-up meeting with representatives of all offshore teams to share the progress of the teams.

**B-** Request the offshore teams to send daily emails to the CTO with the progress of the teams.

**C-** Ask the offshore teams to add their progress and status in a shared spreadsheet.

**D-** A Request the offshore teams to share their work in progress in a virtual Kanban board tool.

## Answer:

D
