Question 1

Question Type: MultipleChoice

Universal Containers has a strict security model enforced through object, field, and row-based security mechanisms. The Architect would like to ensure the security model is being thoroughly tested using Apex automated tests. Which three considerations should be made when using the runAs() method to design Apex unit tests?

Options:

- A- runAs() does not enforce user permissions or field-level permissions in test classes
- B- runAs() can be used inside of test classes to validate record-level security
- C- runAs() can be used inside of test classes to validate field-level permissions
- D- runAs() can be used outside of test classes to bypass record-level security
- E- runAs () counts towards total DML statements issued within transaction

Answer:

A, B, E

Question 2

Question Type: MultipleChoice

Universal Containers wants to create a way to store sensitive Invoice Data in Salesforce. A User who owns an Account should not see every Invoice, but only invoices that they or their subordinates own. Which two features should be considered during this solution implementation?

Choose 2 answers.

Options:

- A-** Deploy the Relationship between Accounts and the Invoices Object as Master-Detail.
- B-** Ensure that the Organization-Wide Default sharing for Invoices is set to Private.
- C-** Create a Workflow that populates the Invoice sharing object upon Insert.
- D-** Deploy the Relationship between Accounts and the Invoices Object as Lookup.

Answer:

A, B

Question 3

Question Type: MultipleChoice

For the Universal Containers Commercial and Consumer support departments, having access to Activities for Contacts with which they interact is important. Commercial support users should not see Consumer Accounts/Contacts and Consumer support users should not see Commercial Accounts/Contacts. Assuming the Organization-Wide Default for Activities is set to "Controlled by Parent" what is the minimum level of Sharing access a support user would need to Accounts/Contacts to view associated Activities?

Options:

- A-** Private Account/Contact Sharing Default with a Sharing Rule for each department set to Public Read/Write access to Accounts/Contacts.
- B-** Private Account/Contact Sharing Default with a Sharing Rule for each department set to Private access to Accounts/Contacts.
- C-** The users need no access to Accounts/Contacts with the proper Activity Sharing Rules and Profile Permissions for the Accounts Tab.
- D-** Private Account/Contact Sharing Default with a Sharing Rule for each department set to Public Read only access to Accounts/Contacts.

Answer:

D

Question 4

Question Type: MultipleChoice

Universal Containers has a requirement to share Accounts automatically to the users at a field office. They currently have the following setup in their environment:

- * Accounts are set to Private in the Org-Wide Default.
- * The field office is specified by a lookup in the Account object.
- * There are 400 field offices.
- * The users in each field office are managed using public groups.

Based upon a lookup relationship field on the Account, how should the Architect meet this requirement?

Options:

- A-** Use Manual Sharing to share the Account with the appropriate field office.
- B-** Use Account Teams to share the Account with the appropriate field office.
- C-** Use Programmatic Sharing to share the Account with the appropriate field office.
- D-** Use Criteria-Based Sharing to share the Account with the appropriate field office.

Answer:

C

Question 5

Question Type: MultipleChoice

If OWD is Public Read Only, what are sharing access options

Options:

A- Read, - Read/Write

Answer:

A

Question 6

Question Type: MultipleChoice

Partner users can access records belonging to users in their account at their same role or lower in the role hierarchy, for Cases, Leads, Opportunities and Custom Objects. Which of the following access has to be given ?

Options:

A- Super user permission

Answer:

A

Question 7

Question Type: MultipleChoice

Universal Containers has set Partners users who will see records owned by partner users in roles below them in the hierarchy of which roles?

Options:

A- Executive, Manager, and User

Answer:

A
