Question 6

Question Type: MultipleChoice

A customer is looking to implement Discovery Framework to manage their intake and clinical assessments.

Which three capabilities should a consultant configure with Health Cloud out-of-the-box to enhance their assessment functionality?

Options:

- A) Using Previously Submitted Responses
- B) Digital Signature Capture
- C) Adding a QR Code
- D) SMS Assessment Completion

Answer:

A, B, C

Explanation:

To enhance their assessment functionality with Discovery Framework, a consultant should configure the following capabilities with Health Cloud out-of-the-box:

Using Previously Submitted Responses: This capability allows users to pre-populate assessment questions with responses from previous assessments, saving time and effort. Users can also edit the responses if needed¹.

Digital Signature Capture: This capability allows users to capture electronic signatures from patients or other parties on the assessment form, ensuring consent and compliance. Users can also view and download the signed document as a PDF file².

Adding a QR Code: This capability allows users to generate a QR code for the assessment form, which can be scanned by patients or other parties to access and complete the assessment on their mobile devices. Users can also track the status of the QR code and send reminders if needed. FHIR Question Bank or SMS Assessment Completion are not capabilities that are available with Health Cloud out-of-the-box.

Question 7

Question Type: MultipleChoice
