Question 1

Question Type: MultipleChoice

How does Salesforce protect your org from all other customer orgs on a multitenancy platform?

Options:

- A- Uses a unique identifier which is associated with user's session
- B- Restricts IP addresses users can log in from
- C- Uses only server authentication
- D- Leverages only classic encryption

Answer:

A

Question 2

Question Type: MultipleChoice

When will a user select the "Unique" check box next to a field as part of their Data Mask configuration?

Options:

- A- If a user wants to mask with data generated using a defined pattern.
- B- When a user wants to prevent unintended reuse of library words or random characters
- C- Whenever a user needs to delete sensitive data entirely, leaving an empty data set
- D- When a user needs to specify a minimum and maximum value for the field.

Answer:

B

Question 3

Question Type: MultipleChoice

What three are driving factors for Data Mask completion time?

Options:

- A- Number of fields being masked
- B- The amount of data in the fields
- C- A valid distractor
- D- The time of day a config is run
- E- Type of masking rules selected

Answer:

A, B, E

Question 4

Question Type: MultipleChoice

Which technology enables an admin to query for data or write custom code when enforcing a security policy?

Options:

- A- An apex based Transaction Security Policy
- B- Process Builder
- C- Threat Detection
- D- Real-Time Events

Answer:

A

Question 5

Question Type: MultipleChoice

When is it necessary to set an object configuration to "Run in Serial Mode"?

Options:

- A- To mask objects that have multiple records with master detail or lookup relationships to the same record
- B- For each custom object that is part of the configuration
- C- Each time a configuration needs to be run more than one time

D- When a user needs to replace sensitive data with a random number

Answer:

A

Question 6

Question Type: MultipleChoice

How do triggers and process automations deactivate before running a Data Mask configuration?

Options:

A- Triggers and process automation do not need to be deactivated to run a configuration

B- User will manually deactivate all automated actions before running a configuration

C- User will need to run a script in the developer console to deactivate any automated processes

D- While running a configuration, Data Mask will automatically disable triggers and process automation before the masking begins

Answer:

D

Question 7

Question Type: MultipleChoice

Which of the following is a blocker to rolling out MFA?

Options:

- A- Licensing for Transaction Security Policies
- B- Users refusing to install applications on their personal phones
- C- Shared accounts or credentials
- D- Licensing for Login Flows

Answer:

C

Question 8

Question Type: MultipleChoice

What is the primary difference between Data Mask and Data Encryption?

Options:

- A-** Data encryption is used for masking data in a production environment
- B-** Data encryption is an add on feature to the Data Mask product
- C-** Data Mask prevents malicious attackers from accessing or interacting with sensitive data at rest in the data center.
- D-** Data masking prevents developers or other users from viewing sensitive data in the user interface or exporting it as plain text

Answer:

C

Question 9

Question Type: MultipleChoice

What is the difference between Classic Encryption and Platform Encryption?

Options:

- A- Classic Encryption encrypts standard fields
- B- Platform Encryption encrypts custom fields only. Classic Encryption encrypts standard fields
- C- Platform Encryption is built on Classic Encryption
- D- Classic Encryption masks characters whereas Platform Encryption does not

Answer:

D

Question 10

Question Type: MultipleChoice

Which two reasons explain this?

Options:

- A- Entering codes from text messages is error-prone

- B-** Mobile devices can be lost or broken
- C-** Email account credentials can be compromised
- D-** SIM cards can be hacked

Answer:

A, C

Question 11

Question Type: MultipleChoice

Why do admins need Shield Platform Encryption?

Options:

- A-** To protect data from external hackers
- B-** To meet regulatory compliance mandates
- C-** To mask sensitive data on UI and API
- D-** To encrypt ALL data Salesforce does not allow email or SMS text messages as verification methods for MFA.

Answer:

C

Question 12

Question Type: MultipleChoice
