# Question 1

---

**Question Type:** MultipleChoice

---

The termination of the ability of a product to perform its required function can be defined as .

## Options:

---

- A- Failure
- B- Termination
- C- Hindrance
- D- Obstacle

## Answer:

---

A

## Explanation:

---

According to the EPI Data Centre Professional (CDCP) Preparation Guide, failure is defined as "the termination of the ability of a product to perform its required function" (page 9). Failure can occur due to various reasons, such as wear and tear, design flaws, human errors,

environmental factors, or external events. Failure can affect the availability, reliability, and performance of a product, system, or service.

## Question 2

---

**Question Type: MultipleChoice**

---

Which type of Humidifier is composed of water-filled canister containing electrodes?

### Options:

---

- A- Infrared Humidifiers
- B- Water Canister Humidifier
- C- Steam Canister Humidifier
- D- Ultrasonic Humidifier

**Answer:**

---

C

**Explanation:**

---

A steam canister humidifier is a type of humidifier that uses electricity to heat water in a canister containing electrodes. The water conductivity and the water level determine the amount of current and steam production. The steam canister humidifier is also known as an electrode boiler humidifier or an electrode steam humidifier<sup>123</sup>.

## Question 3

---

**Question Type:** MultipleChoice

---

Which one of the following is an example of Direct Cost?

**Options:**

---

**A-** Legal fees

- B-** Damaged brand perception
- C-** Negative public relations
- D-** Reduced customer satisfaction

**Answer:**

---

A

**Explanation:**

---

Legal fees are an example of direct cost because they can be directly attributed to a specific project, product, or service. Legal fees are incurred for the purpose of obtaining legal advice, drafting contracts, resolving disputes, or complying with regulations related to the core business activity. Legal fees are not general overhead expenses that are shared by multiple cost objects.

## Question 4

---

**Question Type:** MultipleChoice

---

Which one of the following is an example of Indirect Cost?

### Options:

---

- A- Legal fees
- B- Damaged brand perception
- C- System recovery
- D- Cost revenues

### Answer:

---

B

### Explanation:

---

Damaged brand perception is an example of an indirect cost because it is not directly related to a specific product or service, but rather to the overall reputation and image of the company. Damaged brand perception can result from various factors, such as poor quality, customer dissatisfaction, security breaches, or negative publicity. Damaged brand perception can affect the company's ability to attract and retain customers, partners, and investors, and thus reduce its profitability and competitiveness.

## Question 5

---

Question Type: MultipleChoice

---

Mean time between failures is best considered a measure of:

### Options:

---

- A- Size
- B- Cost
- C- Duration
- D- Reliability

### Answer:

---

D

### Explanation:

---

Mean time between failures (MTBF) is a measure of the reliability of a system or component. It represents the average time that a system or component will operate before it fails. The higher the MTBF, the more reliable the system or component is. MTBF is calculated by dividing the total time of operation by the number of failures that occur during that time. MTBF is used to compare the reliability of similar systems or components, and to help with maintenance planning, inventory management, and system design.

## Question 6

---

**Question Type:** MultipleChoice

---

Which one of the following is the last stage in Stages of Combustion?

**Options:**

---

**A-** Visible Smoke

**B-** Intense Heat

**C-** Incipient

**D-** Flaming Fire

**Answer:**

---

D

**Explanation:**

---

The last stage in stages of combustion is flaming fire, which occurs when the fuel vapors and oxygen are mixed in the right proportion and ignited by a flame or a spark. Flaming fire is characterized by visible flames, intense heat, and rapid oxidation. Flaming fire can cause severe damage to the data center equipment, personnel, and business continuity. Therefore, it is important to prevent or suppress flaming fire as soon as possible using appropriate fire detection and suppression systems.

## Question 7

---

**Question Type:** MultipleChoice

---

Which one of the following represents the three elements (oxygen, heat and fuel) to interact in order for the fire to exist?

### Options:

---

- A- The Fire Hexagon
- B- The Fire Class
- C- The Fire Triangle

## D- The Fire Technology

### Answer:

---

C

### Explanation:

---

The fire triangle is a simple model that illustrates the three elements a fire needs to ignite: heat, fuel, and an oxidizing agent (usually oxygen). A fire naturally occurs when the elements are present and combined in the right mixture. A fire can be prevented or extinguished by removing any one of the elements in the fire triangle.

## Question 8

---

### Question Type: MultipleChoice

---

Which one of the following does a Physical Infrastructure consists of in a Data Centre?

### Options:

---

A- Hub

B- Switch

C- Rack

D- Server

**Answer:**

---

C

**Explanation:**

---

A physical infrastructure in a Data Center consists of racks, which are metal frames used to store and organize server and other IT equipment. The racks are usually arranged in rows and columns, and they can be used to hold servers, storage devices, and other pieces of IT equipment. The racks can also be used to organize cables and other components to ensure that the Data Center is kept organized and efficient.
