# Question 1

---

## Question Type: MultipleChoice

---

You have an Azure subscription that contains an Azure OpenAI resource named All and an Azure AI Content Safety resource named CS1.

You build a chatbot that uses All to provide generative answers to specific questions and CS1 to check input and output for objectionable content.

You need to optimize the content filter configurations by running tests on sample questions.

Solution: From Content Safety Studio, you use the Moderate text content feature to run the tests.

Does this meet the requirement?

### Options:

---

A- Yes

B- No

### Answer:

---

B

## Question 2

---

### Question Type: Hotspot

---

You have an Azure subscription.

You plan to build a solution That will analyze scanned documents and export relevant fields to a database.

You need to recommend which Azure AI service to deploy for the following types of documents:

- \* Internal expenditure request authorization forms
- \* Supplier invoices

The solution must minimize development effort.

What should you recommend for each document type? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

## Answer Area

Internal expenditure request authorization forms:

- An Azure AI Document Intelligence custom model
- An Azure AI Document Intelligence custom model**
- An Azure AI Document Intelligence pre-built model
- Azure AI Custom Vision
- Azure AI Immersive Reader
- Azure AI Vision

**Answer:**

---

## Question 3

Supplier invoices:

- Azure AI Immersive Reader
- An Azure AI Document Intelligence custom model
- An Azure AI Document Intelligence pre-built model
- Azure AI Custom Vision
- Azure AI Immersive Reader**
- Azure AI Vision

**Question Type: MultipleChoice**

---

You have an app named App1 that uses a custom Azure AI Document Intelligence model to recognize contract documents. You need to ensure that the model supports an additional contract format. The solution must minimize development effort. What should you do?

## Options:

---

- A-** Lower the confidence score threshold of App1.
- B-** Lower the accuracy threshold of App1.
- C-** Add the additional contract format to the existing training set. Retrain the model.
- D-** Create a new training set and add the additional contract format to the new training set.
- E-** Create and train a new custom model.

**Answer:**

---

C

## Question 4

---

**Question Type: DragDrop**

---

You have an Azure subscription that contains an Azure OpenAI resource named AH.

You need to analyze an image to obtain a text description.

Which four actions should you perform in sequence from Azure OpenAI Studio? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

## Actions

Open **Completions playground** and select the deployed model.

### Answer:

Create a new deployment and select a DALL-E model.

Open **Chat playground** and select the deployed model.

## Question 5

**Question Type: Hotspot**  
In the System message field, enter a system message that describes the task.

You are developing an app that will use the Azure AI vision API to analyze an image.

Create a new deployment, select a GPT-4 model, and set Model version to **vision-preview**.

You need configure the request that will be used by the app to identify whether an image is clipart or a line drawing.

Create a new deployment, select a GPT-4 model, and set Model version to **2.0**.

How should you complete the request? To answer, select the appropriate options in the answer area.

NOTE: Each correct select is worth one point.

In the Chat session pane, enter a text prompt of Describe this image and

## Answer Area

### Answer Area

GET
PATCH
POST

iveservices.azure.com/vision/v3.2/analyze?visualFeatures=

description
imageType
objects
tags

&details=(string)&language=e

### Answer:

## Question 6

**Question Type: MultipleChoice**

---

You have an Azure subscription that contain an Azure OpenAI resource named AI1.

You build a chatbot that uses AI1 to provide generation answers to specific questions.

You need to ensure that the chatbot checks all input output for objectionable content.

Which types of resource should you create first?

**Options:**

---

**A-** Azure Machine Learning

**B-** Log Analytics

**C-** Azure AI Content Safety

**D-** Microsoft Defender Threat intelligence (Defender TI)

**Answer:**

---

C

**Question 7**

---

## Question Type: Hotspot

---

You have an Azure subscription that contains an Azure AI Document intelligence resource named D1.

You create a PDF document named test.pdf that contain tabular data.

You need to analyze Test.pdf by using DI1.

How should you complete the command? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
curl -v -i POST "{endpoint}/formrecognizer/documentModels/ :analyze?api-version=2023-07-31" -H "Content-Type: application/json"
-H : {yourkey}" --data @t.pdf'"
```

Key1  
Ocp-Apim-Subscription-Key  
Subscription-Key

prebuilt-contract  
prebuilt-document  
prebuilt-layout  
prebuilt-read

**Answer:**

---

## Question 8

---

### Question Type: DragDrop

---

You have a web app that uses Azure AI search.

When reviewing activity, you see greater than expected search query volumes. You suspect that the query key is compromised.

You need to prevent unauthorized access to the search endpoint and ensure that users only have read only access to the documents collection. The solution must minimize app downtime.

Which three action should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Delete the compromised key.
- Regenerate the secondary admin key.
- Regenerate the primary admin key.
- Change the app to use the secondary admin key.
- Change the app to use the new key.
- Add a new secondary key.

**Answer Area**

**Answer:**

**Question 9**

**Question Type: MultipleChoice**

You have the following C# function.

```
static void MyFunction(TextAnalyticsClient textAnalyticsClient, string text)
{
    var response = textAnalyticsClient.ExtractKeyPhrases(text);
    Console.WriteLine("Key phrases:");

    foreach (string keyphrase in response.Value)
    {
        Console.WriteLine($"{keyphrase}");
    }
}
```

You call the function by using the following code.

```
MyFunction(textAnalyticsClient, "the quick brown fox jumps over the lazy dog");
```

Following 'key phrases' what output will you receive?

**Options:**

---

- A- Jumps over the
- B- The quick brown fox jumps over the lazy dog
- C- Quick brown fox lazy dog
- D- The quick

**Answer:**

---

C

## Question 10

---

**Question Type: Hotspot**

---

You have an app that uses the AI Language custom question answering service.

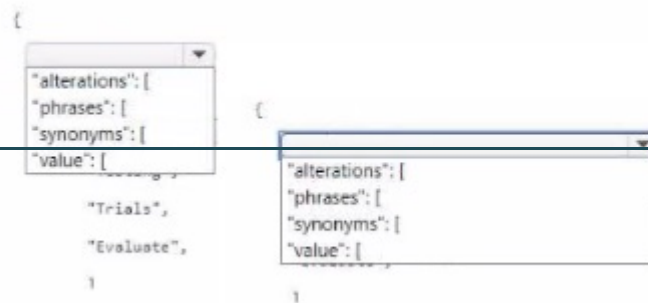

You need to add alternatives for the word testing by using the Authoring API.

How should you complete the JSON payload? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

## Question 11

Question Type: Hotspot

You plan to provision Azure AI service resources by using the following method.

Answer Area

Answer:

## Question 12

Question Type: MultipleChoice

You are building a solution in Azure that will use Azure AI Language service to process sensitive customer data.

You need to ensure that only specific Azure processes can access the Language service. The solution must minimize administrative.

What should you include in the solution?

**Options:**

---

- A- Azure Application Gateway
- B- IPsec rules
- C- A virtual network gateway
- D- Virtual network rules

**Answer:**

---

D
