Question 1

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop deployment.

You need to ensure that users are signed out automatically when they disconnect from a session.

Solution: From the Local Group Policy Editor, you configure the Session Time Limits settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 2

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop deployment

You need to ensure that users are signed out automatically when they disconnect from a session.

Solution: From the Local Group Policy Editor, you configure the Connections settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 3

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop deployment.

You need to ensure that users are signed out automatically when they disconnect from a session.

Solution: From the Local Group Policy Editor, you configure the Remote Session Environment settings.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 4

Question Type: Hotspot

Your network contains an on-premises Active Directory domain that syncs to a Microsoft Entra tenant. The domain contains the users shown in the following table.

Name	Role	Member of
User1	Desktop Virtualization Workspace Reader	Group1

Name	Application	Assignment
AppGroup1	Microsoft Word	Group1

Name	Application group	Assignment
Workspace1	AppGroup1	Group1, Group2
Workspace2	AppGroup2	Group2

The following table shows the application groups shown in the following table.

statement is true. Otherwise, select No.

one point.

Answer Area

Statements	Yes	No
User1 has PowerPoint listed in the Remote Desktop client.	<input type="radio"/>	<input type="radio"/>
User1 has Word listed in the Remote Desktop client.	<input type="radio"/>	<input type="radio"/>
User2 has PowerPoint listed in the Remote Desktop client.	<input type="radio"/>	<input type="radio"/>

Answer:

Question 5

Question Type: MultipleChoice

Your on-premises network contains an Active Directory domain that syncs with a Microsoft Entra tenant.

You have a new Azure virtual network named VNet1.

You plan to implement an Azure Virtual Desktop host pool named Pool1. The session hosts in Pool1 will be joined to the Active Directory domain.

You need to recommend a networking solution for connectivity between Azure Virtual Desktop and the on-premises network.

Which three resources should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- a public load balancer
- B- a local network gateway
- C- a VNet-to-VNet connection type
- D- a Site-to-site (IPSec) connection type
- E- a virtual network gateway
- F- a public IP address for every session host

Answer:

B, D, E

Question 6

Question Type: Hotspot

You have an Azure subscription named Sub1 that contains a resource group named RG1. RG1 contains an Azure Virtual Desktop deployment. The deployment contains a host pool named Pool1.

You plan to configure Pool1 to meet the following requirements:

- * Session hosts must start automatically as user demand increases.
- * Azure Virtual Desktop must have permission to turn on session host virtual machines.

What should you configure, and which role should you assign to the Azure Virtual Desktop service principal? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Configure: Start VM on Connect

- A scaling plan
- Drain mode
- RDP Properties
- Start VM on Connect

Answer:

Assign: Desktop Virtualization Power on Contributor for RG1

- Desktop Virtualization Contributor for RG1
- Desktop Virtualization Contributor for Sub1
- Desktop Virtualization Power on Contributor for RG1
- Desktop Virtualization Power on Contributor for Sub1

Question 7

Question Type: MultipleChoice

You have an Azure subscription that contains an Azure Virtual Desktop deployment and the storage accounts shown in the following table.

Name	Kind	Location
storage1	StorageV2	East US
storage2	FileStorage	East US
storage3	BlobBlockStorage	East US
storage4	StorageV2	West US

You plan to deploy a host pool named Poo 11 to the East US Azure region. Poo 11 will use FSLogix Profile Containers and Office Containers.

Which storage accounts can Pool! use?

Options:

- A- storage2 only
- B- storage 1 and storage2 only
- C- storage1, storage2, and storage3 only
- D- storage1, storage2, and storage4 only
- E- storage1, storage2, storage3, and storage4

Answer:

D

Question 8

Question Type: MultipleChoice

You have an Azure Virtual Desktop host pool in the US East Azure region.

You need to ensure that the host pool can fail over to the US West Azure region.

What should you do first?

Options:

- A-** Create a Recovery Services vault.
- B-** Create a virtual machine snapshot of each session host.
- C-** Create an Azure Storage account that uses geo-redundant storage (GRS).
- D-** Create a new host pool.

Answer:

A

Explanation:

<https://docs.microsoft.com/en-us/azure/site-recovery/azure-to-azure-tutorial-enable-replication>

Question 9

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment.

You use the Start/Stop VMs during off-hours feature in Azure.

You need to configure which virtual machines must never be stopped by the solution.

What should you configure?

Options:

A- the Diagnostic settings of the host pool

B- the Start-Stop-VM task

C- an Azure Automation account variable

D- an action group

Answer:

C

Explanation:

<https://docs.microsoft.com/en-us/azure/automation/automation-solution-vm-management>

Question 10

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment.

You deploy and configure Azure Virtual Desktop in a secondary location.

You plan to perform a test failover to the secondary location, but discover existing user sessions to the primary location.

You need to sign out users from the session hosts in the primary location.

Which PowerShell cmdlet should you run?

Options:

A- Invoke-RdsUserSessionLogoff

B- Remove-AzWvdUserSession

C- Invoke-RestMethod

D- Remove-Alias

Answer:

B

Explanation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/disaster-recovery>

Question 11

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

A Microsoft 365 E5 tenant

An on-premises Active Directory domain

A hybrid Azure Active Directory (Azure AD) tenant

An Azure Active Directory Domain Services (Azure AD DS) managed domain

An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You configure a compliance policy in Intune.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

B

Explanation:

You need to configure a Configuration Profile in Intune or use Group Policy.

Question 12

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have the following:

A Microsoft 365 E5 tenant

An on-premises Active Directory domain

A hybrid Azure Active Directory (Azure AD) tenant

An Azure Active Directory Domain Services (Azure AD DS) managed domain

An Azure Virtual Desktop deployment

The Azure Virtual Desktop deployment contains personal desktops that are hybrid joined to the on-premises domain and enrolled in Microsoft Intune.

You need to configure the security settings for the Microsoft Edge browsers on the personal desktops.

Solution: You configure a configuration profile in Intune.

Does this meet the goal?

Options:

A- Yes

B- No

Answer:

A

Explanation:

<https://docs.microsoft.com/en-us/mem/intune/fundamentals/azure-virtual-desktop>
