Question 1

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen

A client subcontracts production work to a vendor for production operations.

You need to model subcontracting of route operations in production orders.

Solution: Ensure that the service product is stocked and is part of the Bill of Materials.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 2

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen

A client subcontracts production work to a vendor for production operations.

You need to model subcontracting of route operations in production orders.

Solution: Ensure that the material routing process is independent of the services procurement process.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 3

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen

A client subcontracts production work to a vendor for production operations.

You need to model subcontracting of route operations in production orders.

Solution: Ensure that subcontracting of route operations supports back-flush costing.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 4

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient

You need to ensure that the system is set up to support the manufacturing process.

Solution: Create a formula version for each concentration level.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 5

Question Type: MultipleChoice

Note. This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient

You need to ensure that the system is set up to support the manufacturing process.

Solution: Configure the catch weight of IngredientA to allow for the variances of the concentrations received from the different vendors.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

A

Question 6

Question Type: MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company implements Dynamics 365 Supply Chain Management and configures the system to support process manufacturing.

The company manufactures pain-relieving lotions. Several of the primary ingredients are delivered at different concentrations depending on the ingredient and vendor. IngredientA is the primary active ingredient in the lotion. IngredientB is used as a compensating ingredient

You need to ensure that the system is set up to support the manufacturing process.

Solution: Set up the IngredientB formula line as a phantom BOM.

Does the solution meet the goal?

Options:

A- Yes

B- No

Answer:

B

Question 7

Question Type: Hotspot

A company uses Dynamics 365 Supply Chain Management. Technicians travel to several facilities to complete routine maintenance on equipment.

The company recently invested in new equipment. The technicians have no experience maintaining the new equipment. The technicians must be able to perform the following activities:

- * Use apps on their mobile device to complete the maintenance.
- * Find links to any visual step-by-step instructions related to the new equipment.

You need to configure features to assist the technicians.

Which features must you configure? To answer, select the appropriate options in the answer area.

Answer Area

Requirement

Use on a mobile device to complete maintenance.

Feature

Asset management mobile workspace
Asset management mobile workspace
Dynamics 365 Remote Assist
Warehouse management mobile app

Link visual step-by-step instructions.

Functional location
Maintenance checklist
Service order
Functional location
Maintenance plan

Answer:

Question 8

Question Type: DragDrop

A company makes lubricants and greases used in the automotive industry. The company plans to implement Dynamics 365 Supply Chain Management.

The system must meet the following requirements:

- * Schedule the batch production of products.
- * Plan for inventory fluctuations of ingredients that are used across different products.
- * Schedule delivery of amounts of proprietary compounds used during production from vendors to keep production runs on schedule and eliminating excess stock on hand or delayed production.

You need to perform the initial setup of the company's Dynamics 365 environment.

At which level should you set up the items? To answer, drag the appropriate setup levels to the correct setup options. Each setup level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Setup levels	Answer Area	Setup option	Setup level
<input type="checkbox"/> Inventory level		Warehouse location	<input type="text"/>
<input checked="" type="checkbox"/> Item level		Catch weight	<input type="text"/>
		Batch number group	<input type="text"/>
		Safety datasheet	<input type="text"/>

Question 9

Question Type: DragDrop

A company uses separate finished good item numbers for size variations of the same product.

The company wants to minimize the number of variously-sized items that are created.

You need to perform the setup to allow variants in size to the product master.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Assign sizes to the individual items.

Answer:

Assign a tracking dimension group for size to the item.

Create a product master.

Question 10

Assign a tracking dimension group for size to the item.

Question Type: MultipleChoice

Assign a tracking dimension group for size to the item under the dimension and variant groups setup menu.

Add product dimensions to the product master.

Generate product variants.

You are responsible for product and formula maintenance for a paint manufacturer. You create a formula for white paint and add its lines. When the formula size increases or an ingredient changes, the quantity of the pigment ingredient must be adjusted proportionately. You need to set up the formula line for the pigment. Which formula feature should you use?

Options:

- A- Pegged supply
- B- Step consumption
- C- Scalable
- D- Variable

Answer:

C

Question 11

Question Type: DragDrop

A beverage manufacturing company is implementing Dynamics 365 Supply Chain Management.

The company will use the batch balancing functionality to create the beverages.

IngredientA must be configured for a target value of 40 with a minimum of 35 and a maximum of 45. IngredientB must be configured to account for target value variances.

You need to configure the ingredient-based calculations

Which ingredient type should you configure for each requirement? To answer, drag the appropriate ingredient types to the correct requirements. Each ingredient type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Ingredient types	Answer Area	Requirement	Ingredient type
<input type="checkbox"/> None			
Answer:		IngredientA: target value of 40 with a minimum of 35 and a maximum of 45	
<input type="checkbox"/> Compensating		IngredientB: account for target value variances	
<input type="checkbox"/> Filler			

Question 12

Question Type: MultipleChoice

A customer produces light projection toys for holiday decorations throughout the year.

You are in the first month of a season. Production flows take one day to complete.

The floor supervisor reports that seasonal production targets will not be met. You review the Kanban schedule board and identify thousands of unplanned jobs.

You need to plan the jobs to be completed two weeks prior to the start of the next season.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE; Each correct selection is worth one point.

Options:

- A- Manually schedule each unscheduled job forward from the date of the end of the season.
- B- Set the Automatic planning option for each unscheduled job to Yes.
- C- Manually schedule each unscheduled job to the next period of the start of the next season.
- D- Set the Automatic planning option for each unscheduled job to No
- E- Manually schedule each unscheduled job on its due date.
- F- Manually schedule each unscheduled job to the previous period of the end of the next season.

Answer:

B, F
