Question 1

Question Type: MultipleChoice

A company uses Dynamics 365 Finance.

You implement an extension of a method named calc in ClassA. The calc method:

- * Accepts an integer as an input parameter.
- * Returns an integer as an output parameter.

You must implement an extension to:

- * Extend the calc method.
- * Prevent the standard code from running if the value of the input parameter is greater than 10-

You need to implement the correct solution. Which code segment should you use?

A)

```
public int calc(int _value)
{
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```

B)

```
public int calc(int _value)
{
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```

C)

```
public int calc(int _value)
{
    int ret = next calc(_value);
    if (_value > 10)
    {
        throw error('The value cannot be greater than 10.');
```

D)

```
public int calc(int _value)
{
    int ret;
    if (_value <= 10)
    {
        ret = next calc(_value);
    }
    return ret;
}
```

Options:

- A- Option A
- B- Option B
- C- Option C
- D- Option D

Answer:

C

Question 2

Question Type: DragDrop

A company uses Dynamics 365 Finance.

You create the following tables.

Table	Requirement
Cascade	Delete related data from other tables when data is deleted from TableA.
Restricted	Prevent deletion of data from TableB if related data exists in another table.
Cascade+Restricted	Delete data if specific conditions are met.

NOTE: Each correct selection is worth one point.

Drag the action types to the correct scenarios. Each delete action is worth one point. You may need to use the split bar between panes or scroll to view content.

Delete actions	Answer Area	Table	Delete action
Cascade		TableA	
Restricted		TableB	
Cascade+Restricted		TableC	

Question 3

Question Type: DragDrop

A company uses Dynamics 365 Supply Chain Management.

You are developing multiple integrations.

You need to select the appropriate integration models for the integrations.

Which integration model should you select? To answer, drag the appropriate data integration models to the correct requirements. Each data integration model may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Data integration models

Azure Data Lake integration

Azure Data Lake integration

Answer:

Local-write

OData

Answer Area

Requirement

Users must be able to view changes in near real time in Dynamics 365 they create or make changes to a product in an external system.

Update and synchronize customer information in Dynamics 365 Supply Chain Management that is created or updated in Dynamics 365 Sales

Share information about the on-hand quantity of products in near real time with an external web-based e-commerce application that supports the OData protocol.

Question 4

Question Type: DragDrop

You are creating a new class and adding methods to the class.

You need to control extensibility capabilities of some of the methods in the class.

Which attribute should you use? To answer, drag the appropriate attributes to the correct requirements. Each attribute may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Attributes	Answer Area
<div data-bbox="143 159 479 231">[Replaceable]</div> <div data-bbox="479 159 792 231">[Wrappable(false)]</div> <div data-bbox="792 159 1106 231">[Replaceable]</div>	<div data-bbox="1926 175 2105 215">Requirement</div>
<div data-bbox="143 239 479 319">Answer: [Wrappable(false)]]</div>	<div data-bbox="1635 247 2237 287">Extenders must be able to subscribe to pre- and post-ev</div>
	<div data-bbox="1635 311 2237 391">Extenders must not be able to use chain of command (CoC) specific method.</div>
	<div data-bbox="1635 422 2237 502">Extenders must be able to wrap the method but must not call next in the chain of command (CoC).</div>

Question 5

Question Type: Hotspot

You are using the Metadata search tool in Visual Studio.

You need to select the appropriate query string for various scenarios.

Which query string should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Scenario

Query string

Find tables that have method names that contain the word insert.

Question 6

Question Type: DragDrop

A company uses Dynamics 365 finance.

Find forms where the form name includes the phrase

account.

You need to select the appropriate TestTransactionMode option for each requirement.

Which options should you use? To answer, drag the appropriate options to the correct requirements. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options	Requirement	Option
<input type="text" value="AutoRollback"/>	Track and delete only insert statements.	<input type="text"/>
<input type="text" value="LegacyRollback"/>	Roll back transactions by using SQL save points.	<input type="text"/>
<input type="text" value="LegacyRollbackWithUpdateTracing"/>		
<input type="text" value="Answer:"/>		

type:table.method name:insert
type:tables,method name:insert
type:table.method name:insert()
type:tables.method name:insert()

type:forms like ccount
type:form like ccount
type:forms ccount
type:form ccount
