# Question 1

---

## Question Type: MultipleChoice

---

A company is planning a Dynamics 365 Finance implementation. The company gathers requirements.

The company is identifying the gaps in the software against the requirements.

You need to identify the information to include in the gap fit analysis.

Which three components should you include? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

### Options:

---

A- category

B- priority

C- timeline for implementation

D- level of effort

E- key stakeholders

### Answer:

---

A, B, D

## Question 2

---

### Question Type: DragDrop

---

A company is planning a Dynamics 365 Finance implementation that has integrations to two other systems. The implementation requirements are not fully defined.

The company plans to build the integrations and configure Dynamics 365 Finance in parallel. The company must ensure that risk assessments are completed after the development of each prototype in each area.

You need to define the methodology to apply to the application lifecycle management (ALM) strategy.

What should you plan for the ALM strategy? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Components	Answer Area
<input type="checkbox"/> Spiral ral	<b>Requirement</b> Build integrations in parallel to configuration.
<input type="checkbox"/> Six Sigma na	Complete risk assessments after each prototype.
<input type="checkbox"/> Waterfall ial	

**Component**

<input type="text"/>
<input type="text"/>

**Answer:**

## Question 3

---

### Question Type: DragDrop

---

A company is implementing Dynamics 365 Supply Chain Management.

The company has invested in new production equipment.

You need to plan for the production equipment to be regularly serviced.

What should you do? To answer, drag the appropriate functions to the correct requirements. Each function may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions	Answer Area
<input type="checkbox"/> Create a work order. r.	<b>Requirement</b>
<input type="checkbox"/> Calculate a cost sheet. it.	Estimate the servicing costs.
<input type="checkbox"/> Schedule a service order. er.	Schedule repair jobs.
<input type="checkbox"/> Calculate a maintenance schedule cost. .i.	<b>Action</b>

Answer:

## Question 4

---

### Question Type: MultipleChoice

---

A company is implementing Dynamics 365 Finance.

The company allows access to production systems only from approved IP addresses. In addition, the company requires multi-factor authentication (MFA) to access production systems.

You need to configure user security to meet the requirements.

Which tool should you use?

**Options:**

---

- A- Microsoft Entra ID conditional access
- B- Microsoft Entra 10 single sign-on
- C- Dynamics 365 Fraud Protection
- D- Dynamics 365 Finance role-based security

**Answer:**

---

A

## Question 5

---

**Question Type: MultipleChoice**

---

A company is implementing Dynamics 365 Finance.

The company requires different vendor check layouts for its three banks. The company needs to know whether there is an existing vendor check format layout that it can use for each bank rather than create custom ones.

You need to identify the appropriate reporting feature.

Which feature should you select?

**Options:**

---

- A- SQL Server Reporting Services (SSRS) reports
- B- Electronic reporting (ER)
- C- Modern report design layout templates
- D- Financial reports
- E- Document management

**Answer:**

---

B

## Question 6

---

**Question Type: MultipleChoice**

---

A company is implementing Dynamics 365 and Microsoft Power Platform.

You need to export only the modified forms that are part of a solution update.

Which option should you use?

**Options:**

---

- A- Select components
- B- Include all components
- C- Include entity metadata
- D- Include no components or metadata

**Answer:**

---

A

## Question 7

---

**Question Type: MultipleChoice**

---

A company uses Dynamics 365 Finance. The company plans to integrate proprietary solutions by using OData web services.

Some web service integrations have a higher importance than others.

When a lower importance web service integration has larger than expected utilization, higher importance web services must operate as expected.

You need to recommend a solution to meet the integration performance requirements.

What should you recommend?

### **Options:**

---

- A-** Create the critical web services by using Azure Logic Apps.
- B-** Assign batch priorities to the integrations.
- C-** Create the critical web services by using Power Automate integrations.
- D-** Run the critical integration batch jobs first.
- E-** Assign throttling priorities to the integrations.

### **Answer:**

---

E

## Question 8

---

### Question Type: MultipleChoice

---

A company implements Dynamics 365 Finance. The company is preparing to deploy a cumulative update.

The company wants to use the Regression suite automation tool (RSAT) to reduce the required manual testing effort before deploying the update.

You need to recommend Lifecycle Services (LCS) tools that can be used to facilitate automated testing.

Which two tools should you recommend? Each correct answer presents a complete solution.

NOTE Each correct selection is worth one point.

### Options:

---

- A- Upgrade analysis
- B- Business process modeler
- C- LCS methodologies
- D- Asset library
- E- Azure DevOps

**Answer:**

---

B, E
