Question 1

Question Type: MultipleChoice

An engineering company is implementing Dynamics 365 Sales. The company has a custom connector to an ERP system.

The company plans to use the connector to view data in the app while also avoiding any data migration.

You need to evaluate the requirements and recommend an approach. Which approach should you recommend?

Options:

- A- Install an industry accelerator.
- B- Create an on-demand Power Automate flow and use the connector to access the data.
- C- Build a canvas app and embed it in the Dynamics 365 Sales app.
- D- Connect the connector directly to the Dynamics 365 Sales app and view the data.

Answer:

B

Question 2

Question Type: MultipleChoice

You are a Microsoft Power Platform architect developing a solution for a car retailer. Your solution includes reference data that relates to car colors, car types, and car models. Automation has been developed and deployed to notify account managers based on the car color, car make, and car model selected by potential buyers.

Notifications are failing to send to account managers due to different record identifiers between environments.

You need to update the reference data across all environments.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Power Automate flows
- B- Configuration Migration tool
- C- Azure Data Factory
- D- Logic Apps
- E- Import Data Wizard

Answer:

A, D

Question 3

Question Type: MultipleChoice

You design integration with an external data source that uses sequential integer values as primary keys for the records contained in it. Data synchronization will occur in Microsoft Dataverse so users can access data.

Data within Microsoft Dataverse must be accurate against the data in the external data source.

You need to ensure that the data from the external data source does not create duplicated rows in Microsoft Dataverse.

Which two features should you use?

Each correct answer presents part of the solution.

Options:

A- Webhook

B- Upsert method

C- Change tracking

D- Alternate key

E- Duplicate detection rules

Answer:

D, E

Question 4

Question Type: Hotspot

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

Requirement

Team type

Answer:

Cleaning teams

	▼
Access	
Owner	

Explanation:

<https://docs.microsoft.com/en-us/power-platform/admin/manage-teams>

Emergency room teams

	▼
Access	
Owner	

Question 5

Question Type: Hotspot

Billing teams

An organization is optimizing its Microsoft Power Platform solution architecture.

The optimization needs to address the following:

	▼
Access	
Owner	

Label names for option sets and multiselect option sets should be added as separate fields for reporting.

Users complain that when a case is assigned to another user, all the activities are also assigned.

Some Power BI reports based on Microsoft Dataverse data need near-real-time updating.

You need to recommend a design solution to meet these requirements.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Design

Answer: Users report that when a case is assigned to another user, all activities are also assigned.

Explanation:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entity-relationship-cascading-behavior>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-powerbi-connector>

For each activity entity relationship, set Cascading to Configurable Cascading and Assign to Cascade.

Do not implement, but train users on best practices for assigning cases.

Create a 1:N relationship between the user entity and the Activities table.

Question 6 Some Power BI reports based on Microsoft Dataverse data require near-real-time updates.

Question Type: Hotspot

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Create Power BI reports using the Microsoft Data connector.

Implement the Data Export Service; create Power BI reports that point to Microsoft Azure SQL Database.

Create Power BI dataflows based on the Microsoft Data connector; point the Power BI report to the dataflow.

Requirement

Component

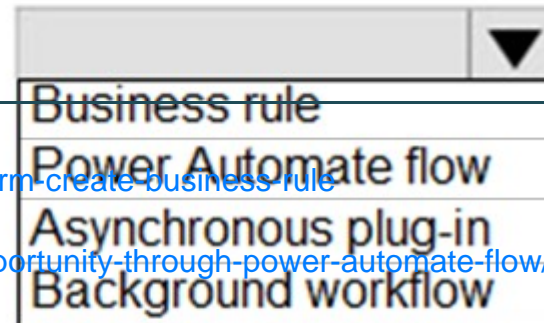

Answer:

Allow users to change the status of a record only if a custom column named Reason is populated.

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

<https://www.inogic.com/blog/2021/12/how-to-win-lose-dynamics-365-crm-opportunity-through-power-automate-flow/>

Question 7
Prompt users to update each opportunity product record when an opportunity is won or lost.

Question Type: Hotspot

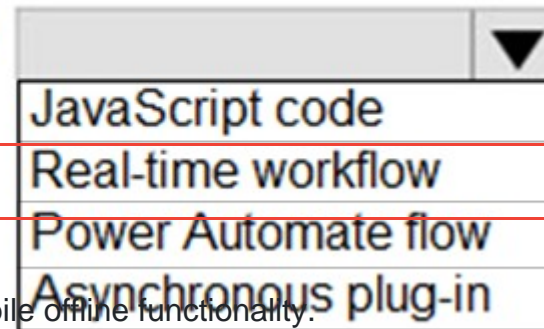

You are supporting a recent go-live for a model-driven app that includes mobile offline functionality.

Users report the following issues:

The process of downloading initial metadata for the app takes hours to complete.

Some account views are unavailable when the app is offline.

Changes to users' security privileges are not reflected in the mobile app.

Contact data is not available when the app is offline.

You need to resolve the mobile app performance issues.

What should you review? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete. Answer.	<div data-bbox="842 480 1720 523">▼</div> <ul style="list-style-type: none"><li data-bbox="842 523 1720 566">Synchronize the mobile app.<li data-bbox="842 566 1720 609">Remove organization data filters.<li data-bbox="842 609 1720 663">Reduce records included in the profile filter.
Changes to users' security privileges are not reflected in the mobile app.	<div data-bbox="842 679 1720 722">▼</div> <ul style="list-style-type: none"><li data-bbox="842 722 1720 766">Synchronize the mobile app.<li data-bbox="842 766 1720 809">Reduce records included in the profile filter.<li data-bbox="842 809 1720 863">Remove reference to tables not included in mobile profile.
Some account views are unavailable when the app is offline. A company is creating a Power Platform solution to manage employees.	<div data-bbox="842 879 1720 922">▼</div> <ul style="list-style-type: none"><li data-bbox="842 922 1720 965">Synchronize the mobile app.<li data-bbox="842 965 1720 1008">Reduce records included in the profile filter.<li data-bbox="842 1008 1720 1062">Remove reference to tables not included in mobile profile.
The company has the following requirements:	<div data-bbox="842 1078 1720 1121">▼</div> <ul style="list-style-type: none"><li data-bbox="842 1121 1720 1165">Reduce records included in the profile filter.<li data-bbox="842 1165 1720 1208">Update mobile profile to include contact information.<li data-bbox="842 1208 1720 1262">Remove reference to tables not included in mobile profile.
Contact data is not available when the app is offline. Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	<div data-bbox="842 1078 1720 1121">▼</div> <ul style="list-style-type: none"><li data-bbox="842 1121 1720 1165">Reduce records included in the profile filter.<li data-bbox="842 1165 1720 1208">Update mobile profile to include contact information.<li data-bbox="842 1208 1720 1262">Remove reference to tables not included in mobile profile.
Allow only approved device types to access the solution and company data.	<div data-bbox="842 1190 1720 1233">▼</div> <ul style="list-style-type: none"><li data-bbox="842 1233 1720 1262">Remove reference to tables not included in mobile profile.

You need to recommend a solution that meets the requirements.

Question 8

Question Type: Hotspot

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	 <ul style="list-style-type: none">Team accessPrivacy preferenceField security profileHierarchy security profile
Explanation:	
https://docs.microsoft.com/en-us/power-platform/admin/field-level-security Allow only approved device types to access the solution and company data.	 <ul style="list-style-type: none">Endpoint securityCompliance policyConditional accessMobile threat integration

Question 9

Question Type: Hotspot

A company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources.

The company reports the following data quality issues with the existing solution:

Users often encounter a character limit when entering data.

The database includes multiple instances of duplicate records.

You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Users often encounter a character limit when entering data.	<ul style="list-style-type: none">Define a data mask.Define and implement duplicate detection rules.Define the data type and format for each column.
Answer:	
Explanation:	
The database includes multiple instances of some records.	<ul style="list-style-type: none">Define requirements for data entry.Define and implement duplicate detection rules.Define the data type and format for each column.

<https://docs.microsoft.com/en-us/power-platform/admin/set-up-duplicate-detection-rules-keep-data-clean>
