Question Type: MultipleChoice

Which two statements are true about Database Vault factors?

Options:

- A-** A factor can reference a function in another schema to compute its value, provided execute privilege is granted to the sys user.
- B-** Changing a factor type can change how factors are evaluated.
- C-** You can configure a factor to be evaluated only once per session.
- D-** You get an error at the time of factor creation if the retrieval method function you have specified does not exist.
- E-** You can use a factor to enforce conditions for a command rule.

Answer:

A, C

Question 2

Question Type: MultipleChoice

As an Autonomous Transaction Processing (ATP) database administrator, you want to extend the storage capacity In the database.

Examine this command and output from the database:

```
CREATE TABLESPACE CRMTS;  
ORA-01031: insufficient privileges
```

What is the reason for the error?

Options:

- A- The storage quota has been reached for the ATP database.
- B- The create TABLESAPECE statement is not available in ATP.
- C- There is not enough storage available in the ATP database.
- D- You must be explicitly granted the create TABLESPACE privilege in ATP.
- E- Database Vault prevents you from executing this command.

Answer:

C

Question 3

Question Type: MultipleChoice

You grant user JANE the SYSDBA administrative privilege. Which two are true?

Options:

- A-** User JANE must always connect as SYSDBA to the database instance.
- B-** User JANE can grant SYSDBA privilege to roles.
- C-** User JANE must use operating system authentication.
- D-** User JANE can create objects in sys schema only when connected as SYSDBA.
- E-** User JANE acquires the DBA role by default.
- F-** User JANE can backup and recover the database.

Answer:

D

Question 4

Question Type: MultipleChoice

You are required to remove embedded passwords from scripts that connect to database instances. Which tool can be used to implement this requirement?

Options:

A- orapki

B- netca

C- dbca

D- netmgr

E- mkstore

F- owm

Answer:

C

Question 5

Question Type: MultipleChoice

Which two statements are true about Valid Node Checking for Registration (VNCR)?

Options:

- A- It denies Instance registration through IPC.
- B- It can only be used with Oracle RAC.
