Question 1

A contract account has multiple services including deregulated electricity, gas, water, and waste water.

The joint invoicing indicators are set on the contracts as follows:

* Electric Distribution = 1 (must),

* Electric Supply = 1 (must),

* Gas = 3 (must not),

* Water = 2 (can),

* Waste Water = 2 (can).

How many invoices are produced when you execute the invoice process if billing documents exist for the Electric Distribution, Gas, and Water services?
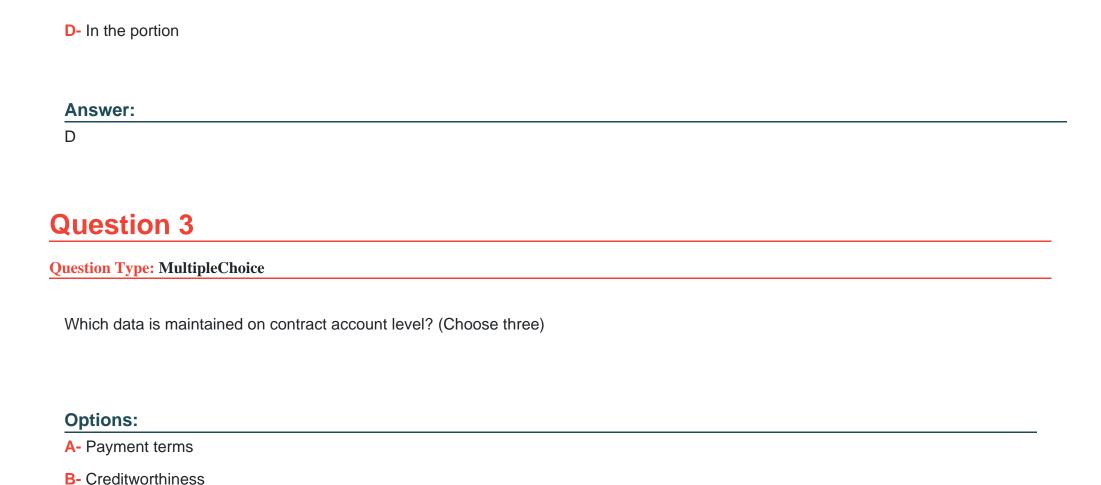

Options:

A- 3

B- 2

C- 1

D- 0

Answer:

B

Question 2

A utility company bills monthly, and considers any billing period that has a length of 25-35 days to be a normal monthly bill.

Where would you enter the interval so that when interval-based period control is selected, the billing engine considers the billing period length when determining the rate step calculation?

Options:

A- In the fact value

B- In the price key

C- In the meter reading unit

D- In the portion

Question 3

Question Type: **MultipleChoice**

Which data is maintained on contract account level? (Choose three)

Options:

A- Payment terms

B- Creditworthiness

C- Individual dunning procedures

D- Bank accounts

E- Interest key

Question 4

Question Type: **MultipleChoice**

How can you prevent dunning for a specific account?

Options:

A- Assign bank details on the business partner.

B- Assign the direct debit outgoing payment method on the contract account.

C- Assign an alternative dunning recipient on the contract account.

D- Assign the direct debit incoming payment method on the contract account.

Answer:

D

Question 5

You are attempting to create master data to test the billing process. When you perform a full installation for the device, you must input the rate type for each billing-relevant register. You enter a valid value in the rate field and choose enter.

Why might the system return an error message and prevent you from saving?

Options:

A- The device can only be installed as billing-relevant.

B- The rate type is configured as facts permissible.

C- The device is actually a device info record.

D- A reference value exists on the installation.

Answer:

B

Question 6

How could you change the billing date for a single customer without adjusting the meter reading unit?

Options:

A- Change the schedule record.

B- Change the alternative portion.

C- Change the portion.

D- Change the parameter record.

Answer:

B

Question 7

Question Type: **MultipleChoice**

You are operating in a deregulated market where a single service provider (ACME Service Provider) has multiple roles: measure grid usage and send bills to customers.

What can you conclude about ACME Service Provider's role within this market?

Options:

A- The role will contain a Service Provider agreement to support sending bills to customers.

B- The role will exist as the Service Provider and Invoice Service Provider on each supply contract.

C- The role will be created as division independent to support its multiple roles.

D- The role will be mapped to multiple service types to support measuring grid usage.

Answer:

B
