Question 1

Question Type: MultipleChoice

Which options do you have to plan both quantities and capacities during line loading in repetitive manufacturing?

Note: There are 2 Correct answers to this question?

Options:

- A- Run MRP with quota arrangement
- B- Run PP/DS heuristic for repetitive manufacturing
- C- Assign planned orders manually in the planning table
- D- Assign planned orders manually in the planning table

Answer:

A

Question 2

Question Type: MultipleChoice

How can you achieve a feasible production plan in case of capacity constraints? Note: There are 3 Correct answers to this question.

Options:

- A- Increase the capacity supply in a time-phased interval.
- B- Determine a time period with available capacity on the planning board.
- C- Execute an infinite production planning run for the critical resources.
- D- Reduce the planning Window.
- E- Form optimum sequence to reduce setup times.

Answer:

A, B, E

Question 3

Question Type: MultipleChoice

What does a line hierarchy in repetitive manufacturing represent?

Options:

- A- A production line with more than one work center
- B- A production line with prioritized work centers
- C- A production line with a parallel sequence in the routing
- D- A production line with an alternative sequence in the routing

Answer:

A

Question 4

Question Type: MultipleChoice

Which time elements can be reduced by a reduction strategy?

Note: There are 3 correct answers to this question.

Options:

- A- Goods receipt processing time
- B- Move time
- C- Wait time
- D- Float after production
- E- Queue time

Answer:

B, D, E

Question 5

Question Type: MultipleChoice

What are some benefits of planning with planned independent requirements? Note: There are 2 correct answers to this question.

Options:

- A- Reduced production times
- B- Reduced delivery times

- C- Option to use make-to-order production
- D- Option to forecast planning for production resources

Answer:

C, D

Question 6

Question Type: MultipleChoice

Where do you maintain the work center that represents the production line for repetitive manufacturing?

Note: There are 2 correct answers to this question

Options:

- A- Production cost collector
- B- Repetitive manufacturing profile
- C- Routing

D- Production version

Answer:

C, D

Question 7

Question Type: MultipleChoice

Which materials have a negative quantity in a bill of material or in a recipe?

Note: There are 3 correct answers to this question

Options:

A- Continuous flow materials

B- Bulk materials

C- By-products

D- Co-products

E- Waste products

Answer:

C, D, E

Question 8

Question Type: MultipleChoice

What is the work center hierarchy in capacity planning?

Options:

- A-** A group of work center in a parallel sequence that is used to split production quantities and work on them in parallel
- B-** A group of alternative work centers providing a cumulative available capacity for production
- C-** A group of work centers in a production line being used in sequence for production
- D-** A group of alternative work centers for production, structured in hierarchy levels by priorities

Answer:

B

Question 9

Question Type: MultipleChoice

which SAP application can be used for forecasting in Supply Chain Planning?

Note: there are 2 correct answers to this question.

Options:

- A- Integration Business Planning (IBP)
- B- Capacity Requirement Planning (CRP)
- C- Supply Chain Management (SCM)
- D- Material Requirement Planning (MRP)

Answer:

A, C

Question 10

Question Type: MultipleChoice

What is the difference between co-products and by-products?

Options:

- A- Only co-products are identified by a special item category in the bill of material (BOM)
- B- Only co-products can be manufactured in isolation from the main product
- C- Only co-products have a zero inventory valuation
- D- Only co-products appear in the process or production order settlement rule

Answer:

D
