## Question 1

---

**Question Type:** MultipleChoice

---

As a TIBCO recommended best practice, what is the preferred method for indicating backwards- compatible changes to a service?

### Options:

---

- A- update the major release number in the WSDL namespace name
- B- update the major release number in the WSDL filename
- C- update the point release number in the WSDL namespace name
- D- update the point release number in the WSDL filename

### Answer:

---

D

## Question 2

---

**Question Type:** MultipleChoice

---

A called sub-process has a Generate Error activity. There are no error transitions in any of the involved processes. What happens when the Generate Error activity is executed?

**Options:**

---

- A-** The process instance terminates.
- B-** The uncaught exception causes the engine to exit.
- C-** The job interface transitions into an error state.
- D-** The sub-process restarts processing with its start activity.

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

The mismatched bandwidth between a message producer and consumer can be solved by setting which property in the TIBCO EMS configuration?

**Options:**

---

A- msg\_swapping

B- multicast

C- max\_msg\_memory

D- flow\_control

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---

Which three actions are classed as 'Non-Destructive Changes' when upgrading a Case Data Model? (Choose three.)

**Options:**

---

A- On an attribute, make it searchable or not searchable.

- B-** Add a mandatory attribute to a class.
- C-** Add a new class.
- D-** Change multiplicity from 1..1 to 1..\*
- E-** On an attribute, change a pattern that is applied to the attribute.
- F-** Change multiplicity lower bounds to a lower value.

**Answer:**

---

A, C, F

## Question 5

---

**Question Type:** MultipleChoice

---

Which three statements are correct about TIBCO Rendezvous? (Choose three.)

**Options:**

---

- A-** Rendezvous distributed queue (RVCMQ) is 1-of-n delivery for load balancing among cooperating processes.
- B-** RVFT is specifically designed for high-speed network interface cards.

- C- Rendezvous reliable delivery (TRDP) is built on top of the UDP protocol.
- D- RVDM is built on top of the TCP layer for point-to-point communication.
- E- RVCM is implemented in the API layer for guaranteed message delivery.

**Answer:**

---

A, C, E

## Question 6

---

**Question Type:** MultipleChoice

---

What are two requirements for deleting a domain? (Choose two.)

**Options:**

---

- A- use TIBCO Domain Utility to delete all secondary servers
- B- undeploy all deployed applications
- C- delete all administrators associated with the domain
- D- stop any LDAP server used by the domain

**Answer:**

---

A, B

## Question 7

---

**Question Type:** MultipleChoice

---

What is used to group a set of related attributes together in a repository?

**Options:**

---

**A-** attribute groups

**B-** input maps

**C-** classification schemes

**D-** output maps

**Answer:**

---

A

## Question 8

---

### Question Type: MultipleChoice

---

Your company is supporting an integration project between two home-grown database applications running on Microsoft and Oracle databases. These applications support 24/7 operations. For the integration project, you are using TIBCO ActiveMatrix BusinessWorks and the TIBCO ActiveMatrix ActiveDatabase Adapter. The project includes: PSeveral ActiveMatrix BusinessWorks processes contained in two process archives (PARI and PAR2)?One ActiveMatrix ActiveDatabase Adapter for each respective database, each contained in a separate adapter archive (AARM and AARO) Given two servers (A and B), what is the correct domain architecture?

### Options:

---

- A-** Server A: primary TIBCO Administrator, secondary PARI, secondary AARM, Master AARO, Master PAR2 v u Server B: Master PARI, Master AARM, secondary AARO, secondary PAR2, secondary TIBCO Administrator
- B-** Server A: primary TIBCO Administrator, secondary PARI, secondary AARM, Master AARO, Master PAR2 u Server B: Master PARI, Master AARM, secondary AARO, secondary PAR2, primary TIBCO Administrator
- C-** Server A: primary TIBCO Administrator, secondary PARI, secondary AARM, Master AARO, Master PAR2  
Server B: secondary PARI, Master AARM, secondary AARO, secondary PAR2, secondary TIBCO Administrator
- D-** Server A: primary TIBCO Administrator, secondary PARI, secondary AARM, Master AA60, Master PAR2 Server B: Master PARI, Master AARM, secondary AARM, secondary PAR2, secondary TIBCO Administrator

### Answer:

---

A

## Question 9

---

**Question Type:** MultipleChoice

---

Which TIBCO product must be pre-installed in the same TIBCOJHOME as ActiveMatrix BusinessWorks?

### Options:

---

- A- TIBCO Business Studio
- B- TIBCO Business Events
- C- TIBCO Enterprise Message Service
- D- TIBCO Runtime Agent

### Answer:

---

D
