Question 1

Question Type: MultipleChoice

Which file needs to exist in the directory where the command docker build run?

Options:

- A- Dockerfile
- B- docker.yaml
- C- Configfile
- D- config.yaml

Answer:

A

Question 2

Question Type: MultipleChoice

What node category is used to enable integrations running in IBM App Connect on IBM Cloud for performing aggregation-style operations?

Options:

- A- Messaging Nodes
- B- Group Nodes
- C- Transaction Nodes
- D- Callable Nodes

Answer:

B

Explanation:

<https://developer.ibm.com/integration/blog/2018/10/08/ibm-app-connect-enterprise-now-supports-group-nodes/>

Question 3

Question Type: MultipleChoice

Which prerequisite task must be done before encrypting a connection to an MQTT server?

Options:

- A-** Create a connection from the MQTT server to the SSL server.
- B-** Configure the Security identity property on the MQTT server to use encrypted message flow.
- C-** Configure the MQTT server to communicate using JMT encryption.
- D-** Create a truststore and import the MQTT server public certificate into the truststore.

Answer:

D

Question 4

Question Type: MultipleChoice

What are two purposes of a user trace?

Options:

- A- Debug message flows and integration servers
- B- Provide more information than the administration log
- C- Provide flow usage metrics
- D- Detect Web-Admin login failures
- E- Monitor user activity

Answer:

A, B

Question 5

Question Type: MultipleChoice

What are two mechanisms for storing user permissions to enable administration security on the Web Console?

Options:

- A- OAuth
- B- LDAP
- C- File
- D- Queue
- E- YAML

Answer:

B, E

Question 6

Question Type: MultipleChoice

What is the file format of resource statistics that are written by resource managers?

Options:

- A- XML
- B- JSON

C- HTML

D- CSV

Answer:

A

Question 7

Question Type: MultipleChoice

What are two attributes of IBM App Connect Enterprise JDBC pooled connections?

Options:

- A- Each JDBC connection that is associated with the message flow instance is maintained until the connection is closed.
- B- A new JDBC connection is created if the maximum pool size has not been reached
- C- Each JDBC connection that is idle for 15 minutes is removed from the pool.
- D- A JDBC connection is created on demand for each message flow instance request
- E- Each JDBC connection that is idle for 60 seconds is closed and is not associated with a message flow instance.

Answer:

A, E

Question 8

Question Type: MultipleChoice

What is the maximum number of integration servers that can be used in a single server running IBM App Connect Enterprise?

Options:

A- Up to 512

B- Unlimited

C- Up to 256

D- Up to 128

Answer:

B

Explanation:

https://www.ibm.com/support/knowledgecenter/SSTTDS_11.0.0/com.ibm.etools.mft.doc/bn28100_.html

Question 9

Question Type: MultipleChoice

What is one reason to organize resources into applications?

Options:

- A- It enables all processes using the module to reference the latest versions
- B- It enables the ability to reference the resources in an Integration Project
- C- It allows for Java and ESQL support in the same message flow
- D- It provides runtime isolation of resources

Answer:

D
