Question 1

What is the purpose of scheduling a virtual Synthesized full backup for tape jobs?

Options:

A- To be able to restore files and folders from tape

B- To be able to create the synthetic full .vbk backup directly on tape

C- To help save additional disk spate on tape

D- To avoid copying a full .vbk file to tape from the source reverse incremental backup Job

Answer:

D

Question 2

If the deduplication setting are changed for an existing job, when will the new setting be applied?

Options:

A- At the next run of the job

B- If any kind of full backup is created

C- If a new active full backup Is created

D- Only when you rescan the repository that stores the backup files

Answer:

C

Explanation:

https://helpcenter.veeam.com/archive/backup/95/vsphere/compression_deduplication.html

To apply new deduplication settings in backup jobs, you must create an active full backup after you change deduplication settings.
Veeam Backup & Replication will use the new block size for the active full backup and subsequent backup files in the backup chain.

Question 3
