Question 1

Question Type: MultipleChoice

What is the format used for Condition Data and Mapping Data when configuring decomposition relationships?

Options:

A- XML

B- JSON

C- CSV

D- Any of the above, depending on a configuration option in XOM Administration

Answer:

B

Question 2

Question Type: MultipleChoice

In a production environment, the Order Decomposition process is initiated by agents using the Decompose Order action button.

Options:

A- TRUE

B- FALSE

Answer:

B

Question 3

Question Type: **MultipleChoice**

What does the Vlocity XOM Administration screen allow you to do?

Options:

A- Review the order orchestration processes dashboard

B- Review orchestration callout failures, and pinpoint causes of order fallout

C- Set access to Order Management record types and layouts for Salesforce profiles.

D- All of the above

Answer:

C

Question 4

Question Type: MultipleChoice

What are the two primary functions of Vlocity Order Management?

Options:

A- Order capture

B- Order fulfilment

C- Order orchestration

D- Order decomposition

Answer:

C, D

Question 5

Question Type: MultipleChoice

What makes a product entity a "technical product" in Vlocity?

Options:

A- It is not Orderable and does not have a price.

B- The Product Specification Type field is set to Resource or Service.

C- The Object Type is set to BASE Service Spec Type or BASE Resource Spec Type.

D- All of the above

Answer:

A

Question 6

Question Type: MultipleChoice

What are the four reasons one might create a technical product entity in Vlocity Order Management?

1The commercial product entity cannot fully describe the product entity in terms that can be understood by the downstream systems.

2.The details of the product entity should be masked from the customer.

3.The product entity maps to a multitude of underlying products, services or resources.

4. To consolidate the number of callouts to a downstream system.

To adhere to TMForum / SIDs product modelling best practices.

To create a fully articulated product hierarchy.

Because Vlocity Order Management requires technical products and their attributes to describe commercial products in terms that can be understood by downstream systems.

In order to be used during order decomposition and orchestration, Vlocity Order Management

technical products must be described using attributes, not fields.

Options:

A- TRUE

B- FALSE

Answer:

A

Question 7

Question Type: **MultipleChoice**

What purpose does the DefaultSystemInterface serve in Vlocity Order Management?

Options:

A- It generates JSON in the appropriate Vlocity format and submits the request to the external orchestration system.

B- It generates XML in the appropriate Vlocity format and submits the request to the external orchestration system.

C- All of the above

D- None of the above

Answer:

A
