Question 1

Question Type: MultipleChoice

The IT team for a regional healthcare company wants to provide several applications to iOS and Android tablets and smartphones as well as Mac and Windows laptops using VMware products. It wants to minimize Windows desktop operating system licensing and support costs.

Which meets the requirements?

Options:

- A- Use Horizon Linked Clones with Writable Volumes.
- B- Use Horizon RDS with application pools.
- C- Use Horizon RDS with Writable Volumes.
- D- Use Horizon Instant Clones with App Volumes.

Answer:

B

Question 2

Question Type: MultipleChoice

A cloud pod architecture has been proposed for a customer with two data centers available in two cities 1700 Miles apart. The data centers are connected using WAN links with sophisticated security requirements and firewall rules.

A WAN maintenance vendor has been contacted to add exceptions to meet cloud pod architecture requirements. The number of ports to be opened to enable datacenter to datacenter communication should stay at a minimum number.

Which two communication ports are required by the WAN maintenance vendor? (Choose two.)

Options:

A- 443

B- 22389

C- 389

D- 4001

E- 8472

F- 8009

Answer:

A, D

Question 3

Question Type: MultipleChoice

A company wants to migrate end user applications to VMware App Volumes. The IT team creates five App Stacks using a Windows desktop VM deployed from a golden master image used for all Horizon desktop pools. Some users experience application failures with a few applications in some of the App Stacks.

What can the IT team do to resolve these application issues?

Options:

- A-** Update the App Volumes Agent in the golden master image, then delete and redeploy the Horizon desktops of the users experiencing issues.
- B-** Install a new copy of the same Windows operating system without any updates, patches, or service packs, and use it as the App Volumes capture VM.
- C-** Refresh the Horizon desktop VMs of the users experiencing the issues.
- D-** Capture each application in a single App Stack and assign each user the correct application using Identity Manager.

Answer:

B

Question 4

Question Type: MultipleChoice

A company has decided to virtualize all of its helpdesk employee's workstations.

These requirements must be met:

- * All applications used by the employees will be published through RDS hosted application.
- * Users will NOT be allowed to store any personal data on their Horizon desktops.
- * The Horizon desktop design should meet maximum storage space efficiency.
- * The Horizon desktop design should meet maximum performance.
- * The Horizon desktop design should meet maximum power savings.

Which three features can be enabled to meet the company's requirements? (Choose three.)

Options:

- A- Full clones
- B- Instant clones
- C- Space Efficient disk format (SEsparse)
- D- Content-based read cache (CBRC)
- E- Virtual SAN (vSAN)

Answer:

B, C, D

Question 5

Question Type: MultipleChoice

A company wants to reduce updating and provisioning time for problematic legacy applications on virtual desktops.

Which two Horizon technologies can meet the requirement? (Choose two.)

Options:

A- Identity Manager

B- Airwatch

C- ThinApp

D- AppVolumes

Answer:

C, D

Question 6

Question Type: MultipleChoice

A company has asked an architect for assistance in reviewing its design plans for distributing a finance application to its users with multiple RDS hosts using a custom load balancing script.

What can the architect recommend for a script with proper load return values to prevent overloading of an RDS host?

Options:

A- Block connections to this RDS host at a load value of block.

- B-** Allow connections to this RDS host at a load value of 0.
- C-** Allow connections to this RDS host at a load value of allow.
- D-** Block connections to this RDS host at a load value of 0.

Answer:

A

Question 7

Question Type: MultipleChoice

Which is a design decision when architecting a Workspace One on-premise implementation supporting Mobile Single-Sign On for iOS devices?

Options:

- A-** Decide what level of trust to use between the Active Directory Kerberos realm and Workspace One's Kerberos realm.
- B-** Make sure that the Mobile applications that are planned to be managed by Workspace One support the Kerberos protocol for Single-Sign On.
- C-** Decide what namespace will be used by the Workspace One portal. This will be used for end-user access to the portal. Decide which

domain is to be used as the Kerberos realm.

D- Decide the namespace to be used by the Workspace One portal. The domain chosen will also be your Kerberos realm.

Answer:

B

Question 8

Question Type: MultipleChoice

The IT Team for a regional government organization wants to implement a VDI system using VMware products.

These design requirements were specified:

- * Automated Horizon RDS Farms and App Volumes to deliver a few Windows applications to iOS and Android devices
- * Horizon RDS Farms to deliver a specialized 3D mapping application
- * Stateless Windows 10 Horizon Instant Clone desktops to task workers, and Horizon Windows 10 desktops with a persistent data disk to power users

What is the minimum number of Master Image VMs to support the design?

Options:

A- 3

B- 2

C- 4

D- 5

Answer:

C
